Re: Voluntary Remediation Program
Addendum to the Soil and Sediment Characterization Report,
Freeport Sierrita Mine Green Valley, Arizona; AZ VRP Site Code: 100073-03

Dear Ms. Taber:

The enclosed document is an Addendum to the Final Soil and Sediment Characterization report dated December 2012 that was submitted to Arizona Department of Environmental Quality (ADEQ) on January 8, 2012. The Addendum presents the results for radiological constituents in soil and sediment at the Sierrita mine located near Green Valley, Arizona. The data reported here were collected from July 2008 through August 2008 during the site characterization program. The characterization program was conducted under the Arizona Voluntary Remediation Program administered by ADEQ.

Sincerely,

A handwritten signature in blue ink, appearing to read 'K. Katapa'.

1. Introduction

This addendum presents the site characterization results for radiological constituents in soil and sediment at the Sierrita Mine located near Green Valley, Arizona (Figure 1-1). The investigation was conducted under the Arizona Department of Environmental Quality (ADEQ) Voluntary Remediation Program (VRP). Freeport McMoRan Sierrita Inc. (Sierrita) was formally accepted into the VRP on August 15, 2007. A VRP Investigation Work Plan (Work Plan) was submitted to the ADEQ in April 2008 (URS, 2008a) and an Addendum – Quality Assurance Project Plan (QAPP) was submitted to the ADEQ on November 20, 2008 (URS, 2008b). Implementation of soil and sediment characterization commenced in June 2008 and was completed in November 2008. A soil and sediment characterization report (SSCR) was submitted to the ADEQ in December 2012 (URS, 2012), that presented the results for metal constituents in soil and sediment. This report is an addendum to the SSCR and presents the remaining soil and sediment analytical results for radiological constituents. Per the meeting with Sierrita, ADEQ and ARCADIS on May 16, 2013 agreement was reached that the soil radiological constituents would be reported as an addendum to the SSCR (URS, 2012). Groundwater characterization was also performed between July 2008 and July 2009, and these results will be submitted to the ADEQ in a separate Groundwater Characterization Report.

1.1 Report Objectives and Scope

Soil and sediment characterization activities were conducted between July 2008 and August 2008 from 10 subareas in the Demetrie Wash Area and included the analysis of the following constituents of interest (COI):

- Trace metals: antimony, arsenic, barium, beryllium, cadmium, calcium, chromium, cobalt, copper, lead, manganese, mercury, molybdenum, nickel, selenium, thallium, and zinc, and total uranium
- Radiological Constituents: radium-226 and radium-228, uranium-234, uranium-235, and uranium-238

Trace metals results in soil and sediment were reported in December 2012 SSCR (URS, 2012). At the time of the report submittal, soil and sediment sample results for radiological constituents of interest (COIs) were planned to be included with the Groundwater Characterization Report (URS, 2012). However, it was decided that an addendum to the December 2012 SSCR would facilitate more efficient review and

completion of the characterization activities for the VRP. Therefore, soil and sediment sample results for the radiological COIs are discussed herein as an addendum to the December 2012 SSCR. Tailings solids and pore water material characterization will be reported in the Groundwater Characterization Report.

This report is meant to serve as an addendum to the December 2012 SSCR. Therefore, VRP characterization objectives and activities, data quality objectives information and general Work Plan deviations are not reiterated here as these were already documented (URS, 2012). Work Plan deviations specific to radiological characterization activities are reported.

2. Soil and Sediment Radionuclides Characterization Results

The following subsections present the characterization results for radionuclide COIs in the soil and sediment. Characterization activities are described in detail in URS (2012). These activities were conducted in nine subareas within the Demetrie Wash (Figure 1-2) and the results presented here are grouped by subareas for consistency with the Work Plan. Additionally, averages of the detected activities (non-detects were not considered in the average calculations) as well as ranges are presented. The three general areas and nine subareas that were characterized include:

1. Former Copper Leach, Electrowinning and Regeneration (CLEAR) Plant Area:
 - Former CLEAR Plant
 - Former E Pond
 - Former Evaporation Pond
 - Old D Pond
2. Former Esperanza Mill Area
 - a. Former Esperanza Mill
 - Former C Pond and C Pond Spoils
 - Former Raffinate Pond
 - Former Laydown Yard
3. Tailing Impoundment Area
 - Former Rhenium Ponds

2.1 Soil and Sediment Radiological Sample Analysis

Soil and sediment samples were submitted to ALS Laboratory Group Inc. (ALS) in Fort Collins, Colorado (formerly Paragon Analytics) for analysis of isotopic uranium (uranium-234, uranium-235, and uranium-238) and isotopic radium (radium-226 and radium-228). Isotopic uranium was analyzed by alpha spectroscopy using American Society for Testing and Materials (ASTM) Method D3972. Radium-226 was analyzed using United States Environmental Protection Agency (USEPA) Method 903.1 (radon emanation). Radium-228 was analyzed by gas flow proportional counting (USEPA Method 9320/904.0M) and gamma spectroscopy (USEPA Method 901.1M). Laboratory analytical reports are provided in Appendix A.

2.2 Work Plan Deviations Specific to Radiological Characterization

General and metal COI-specific deviations from the Work Plan were documented in the December 2012 SSCR. Deviations specific to the radiological characterization activities are listed in this report. In general most of the deviations were due to shallower than anticipated bedrock and the borings were subsequently completed shallower than planned. The other deviations are consistent with what typically occurs during a field program. The deviations do not affect attainment of program objectives or the ability to use the data for analysis and interpretation.

Additional judgmental sample locations were added based on field conditions:

1. Old D Pond

OD-JS03 – added to characterize the center of the pond

2. C Pond Spoils

CS-JS04, CS-JS05, and CS-JS06 - locations were added because the initial locations (CS-JS01, CS-JS02, and CS-JS03) were not staked within the actual spoils area

3. Former Laydown Yard – Former Laydown Yard area samples were added following submission of the Work Plan. These locations were added during the VRP investigation to characterize this newly identified subarea:

- EM-JS02
- EM-JS06

- EM-JS07
- EM-JS08.

The following samples did not follow the nomenclature of the subarea they were collected from and reported:

Former C Pond Spoils

- EM-U25 – sample was randomly selected from 200-foot grid and collected from the Former C Pond Spoils, which is located within the Former Esperanza Mill subarea.

A number of borings were completed shallower than the intended depth (22 ft bgs) due to shallower than anticipated bedrock. These deviations are summarized in Table 2-1.

The CS-JS06 1 to 3 foot sample was reported collected (according the field notes) but a sample result was not provided. The entry was crossed out on the chain of custody (COC).

Two instances in which ALS misread a sample identification written on a COC:

- RA-SD01-1.5-3.0, sampled on 8/11/2008, was misread by ALS on the COC; in the electronic data deliverable (EDD), it was listed as "RA-JS01-1.5-3.0." It is reported correctly in this report.
- OD-SD02-1.5-3.0, sampled on 7/28/2008, was misread by ALS on the COC; in the EDD, it was listed as "OD-SD02-1.5-30." It is reported correctly in this report.

The following are instances in which ALS did not analyze a sample for its intended purpose:

- RA-JS02-1-3 was a soil sample collected for analysis and reported in laboratory report 0812258. Additional sample volume from RA-JS02-1-3 was collected for use as a project-specific matrix spike, according to the COC, however the sample was analyzed as a normal sample and reported in the laboratory report 0812207. Based on the circumstances of collection, the RA-JS02-1-3 sample reported in laboratory report 0812207 will be treated as a field duplicate. For clarity, a "(D)" was added to analytical tables and figures in this report to distinguish the original

sample reported in laboratory report 0812258 from the analytical sample reported in 0812207, which is being treated as a field duplicate.

- RA-SD02 -1.5-3.0 – was the parent soil sample collected for analysis and reported on laboratory report 0812207. A duplicate sample, RA-SD02-1.5-3.0 D, was also collected for analysis and reported on laboratory report 0812258. Additional sample volume, labeled as RA-SD02-1.5-3.0 was reported on laboratory report 0812210. This extra volume may have been collected for use as a project-specific matrix spike or matrix spike duplicate (MS/MSD). However, based on review of 812207 and 812210, no MS/MDS completed for this sample. URS confirmed that parent sample was run in 0812207 and duplicate was run in 0812258, and no MS/MSD was run. URS did not specify what to call the sample from laboratory report 0812210. The sample from laboratory report 0812210 is being treated as a second duplicate – “RA-SD02-1.5-3 D2.”

The following samples were collected in the field but were not submitted to ALS for radionuclide analysis. The sample jars were broken during transportation between ACZ and ALS and therefore radionuclide results are not available.

C Pond Spoils

- JS01-0-1

Former C Pond

- JS01-0-1

Former CLEAR Plant

- M04-0-1
- N08-10-12
- SD07-0-1.5
- SD08-1.5- 3
- SD10-0-1.5

Esperanza Mill

- E24-5-7

Former Raffinate Pond

- JS02-5-7 – it is unclear if sample was collected or not; field notes indicated it would be sampled and refusal was at 7 feet bgs.

Old D Pond

- JS02-5 -7

Rhenium Ponds

- JS01-1-3 – field notes indicate a duplicate was collected at this interval; no duplicate noted in the COC for this sample

The following samples were collected in the field but were not submitted to ALS for radiochemistry analysis. The sample jars were broken when the samples were received by ALS and therefore radiochemistry results are not available.

C Pond Spoils –

- JS05-1-3 D – a parent and duplicate sample were noted on COC, sample CS-JS-05-1-3 was received broken, ALS analyzed the duplicate sample as the parent sample

Former C Pond

- JS02-0-1

Former CLEAR Plant

- JS04-15-17
- SD08-0-1.5

Esperanza Mill

- C22-5-7

Old D Pond

- JS03-1-3– This sample was referred to as a duplicate on the COC (without a parent sample), and was received broken, it was not referred to as a duplicate in the field notes, only one sample was submitted for this interval.

Rhenium Ponds

- JS02-0-1

2.3 Subarea Results

Each of the subareas investigated are discussed below. Results are presented in Tables 2-2 to 2-10. Please note that the term reporting limit is used in the discussion, and this is the same as the minimum detectable concentration (MDC) which is used for reporting radionuclide data. MDC and total propagated uncertainty (TPU) are both provided in the data tables. Sample locations and results are presented in Figures 2-1 to 2-15. Results presented on the figures do not include duplicate sample results (if applicable).

The results of the radionuclide analysis of subarea soils indicate the presence of radionuclides consistent with a highly mineralized area. The Sierrita Mine is located on the west margin of the Santa Cruz Basin and along the east flank of the Sierrita Mountains. The principal geologic units include the alluvial deposits, the Basin-Fill Deposits, and the bedrock complex. While alluvial deposits at the mine are limited to natural drainage channels including the various washes at the mine site, there are unconsolidated deposits across the mine site that overlie the bedrock. The soil and sediment was sampled from the unconsolidated deposits. The deposits consist of coarse-grained, unconsolidated silty-sand and gravel ranging in thickness from a few feet up to tens of feet. The unconsolidated material is likely sourced from weathering of the adjacent geologic units, including the Tertiary intrusive formation called the Ruby Star Granodiorite (granodiorite) that comprise the Sierrita Mountains as well as quartz monzonite porphyry. These rocks are composed of minerals that contain naturally-occurring radionuclides, including uranium and thorium. Rock cores were sampled at the site during characterization activities and analyzed for radionuclide activities. These results will be submitted in the Groundwater Characterization Report. Based on results from the characterization activities, uranium occurs in the granodiorite at concentrations up to 19 mg/kg, and in the monzonite at 35 mg/kg. In addition, radium-226 activity in the granodiorite has been measured up to 5.8 picocuries per gram

(pCi/g), and in the monzonite at up to 11 pCi/g. Acid igneous rocks (such as granodiorite) typically contains 3 mg/kg of uranium, and approximately 1 pCi/g of radium (Eisenbud, 1987). The unconsolidated deposits and bedrock complex at the Sierrita Mine therefore contain natural levels of radioactivity at concentrations and activities consistent with a highly mineralized area.

2.4 Former CLEAR Plant Subarea

The following soil and sediment samples were analyzed for radionuclides in the Former CLEAR Plant subarea:

- 25 soil samples from soil borings at 10 grid sample locations
- 14 soil samples from soil borings at 4 judgmental (JS) sample locations
- 16 sediment samples from borings at 9 sediment (SD) sample locations

Refer to Figure 2-1 for the locations of the soil and sediment samples.

According to the December 2012 SSCR, soil borings in the Former CLEAR Plant subarea were advanced to the underlying bedrock which was encountered between 3 and 20 feet bgs. The soils overlying bedrock generally consisted of loose silty sands with gravel sized fill material (URS, 2012).

Sediment samples were collected from each of the four drainages that flow eastward to Demetrie Wash and from one drainage that flows south toward the Old D Pond. Sediment borings were advanced to a maximum depth of 3 feet bgs (URS, 2012).

2.4.1 Soil Radionuclide Results

Radium-226 was not detected above the laboratory reporting limit in two samples, CP-O09-10-12 and CP-Q09-0-1. In total, thirty-nine soil samples were analyzed for radionuclides in the Former CLEAR Plant subarea. Radium-228, uranium-234, and uranium-238 activities were detected above the laboratory reporting limit in each sample collected. Uranium-235 was not detected above the laboratory reporting limit in three samples, P07-5-7, P12-0-1, and CP-JS01-0-1.

Radium-226 was detected at activities in soil ranging from 0.64 to 5.3 pCi/g in the Former CLEAR Plant subarea. The average detected activity of radium-226 in soil was

2.3 pCi/g. Radium-228 was detected at activities in soil ranging from 1.2 to 7.6 pCi/g and the average detected activity was 2.3 pCi/g.

In the Former CLEAR Plant subarea uranium-234 was detected at activities in soil ranging from 0.84 to 12 pCi/g. The average detected activity of uranium-234 in soil was 2.6 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.02 to 0.74 pCi/g and the average detected activity was 0.17 pCi/g. Uranium-238 was detected at activities in soil ranging from 0.84 to 12 pCi/g and the average detected activity was 2.7 pCi/g. Soil radionuclide results from the Former CLEAR Plant subarea are presented in Table 2-2. Radionuclide sample results are shown on Figure 2-2.

2.4.2 Sediment Radionuclide Results

Sixteen sediment samples were collected and analyzed for radionuclides in the Former CLEAR Plant subarea. All analytes were detected above reporting limits with the exception of uranium-235 in CP-SD03-1.5-3.0, CP-SD07-1.5-3, and CP-SD10-1.5-3.0.

Radium-226 was detected at activities in sediment ranging from 0.61 to 3 pCi/g in the Former CLEAR Plant subarea. The average detected activity of radium-226 in sediment was 2.0 pCi/g. Radium-228 was detected at activities in sediment ranging from 1.4 to 2.7 pCi/g and the average detected activity was 2.0 pCi/g.

In the Former CLEAR Plant subarea uranium-234 was detected at activities in sediment ranging from 0.98 to 2.3 pCi/g. The average detected activity of uranium-234 in sediment was 1.7 pCi/g. Uranium-235 was detected at activities in sediment ranging from 0.043 to 0.15 pCi/g and the average detected activity was 0.1 pCi/g. Uranium-238 was detected at activities in sediment ranging from 1.1 to 2.4 pCi/g and the average detected activity was 1.8 pCi/g. Sediment radionuclide results from the Former CLEAR Plant subarea are presented in Table 2-2. Radionuclide sample results are shown on Figure 2-2.

2.4.3 Former CLEAR Plant Subarea Summary

The following areas exhibited highest activities:

- An area in the northern portion of the Former CLEAR Plant subarea, characterized by soil sample locations CP-M04, CP-JS04, and CP-O03. Isotopic radium and uranium activities were generally highest between 5-7 feet bgs or in the case of

CP-O03, where bedrock was encountered at 3 feet bgs, at the deepest soil sample interval, 1-3 feet bgs.

- An area located on the central portion of the subarea, characterized by soil sample locations CP-N08 and CP-JS-02. The highest activities of uranium-234 and 238 were located in the soil sample collected at CP-JS02 from 0-1 feet bgs. However significant lower activities were detected at the deeper samples collected at 1 to 3 feet bgs.

An area located on the eastern portion of the subarea, characterized by soil sample locations CP-JS03 and P07. Soil sample CP-JS03 and P07 contained the highest activities of radium-226 in the subarea at the 5 to 7 feet bgs and 1 to 3 feet bgs sample intervals, respectively.

2.5 Former E-Pond Subarea

The following samples were analyzed for radionuclides in the Former E Pond subarea:

- Five soil samples from borings at 2 JS sample locations

The two soil borings (E-JS01 and E-JS02) were advanced through the footprint of the former impoundment, and according to the December 2012 SSCR, were advanced to the underlying bedrock. Refusal of the direct-push Geoprobe® drilling rig occurred between five and eight feet bgs. As stated in the December 2012 SSCR, the overlying soil above bedrock was shallower to the east of the Former E Pond and overlying soils generally consisted of loose silty sands with layers of cobble-sized fill material (URS, 2012).

2.5.1 Soil Radionuclide Results

Radionuclide COIs were detected at activities above the reporting limits in all samples collected from the Former E Pond area. Radium-226 was detected at activities in soil ranging from 1.3 to 4.8 pCi/g in the Former E-Pond subarea. The average detected activity of radium-226 in soil was 2.3 pCi/g. Radium-228 was detected at activities in soil ranging from 1.4 to 3.5 pCi/g and the average detected activity was 2.4 pCi/g.

In the Former E-Pond subarea uranium-234 was detected at activities in soil ranging from 1.8 to 4.6 pCi/g. The average detected activity of uranium-234 in soil was 2.6 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.072 to 0.31pCi/g

and the average detected activity was 0.14 pCi/g. Uranium-238 was detected at activities in soil ranging from 1.6 to 4.9 pCi/g and the average detected activity was 2.8 pCi/g. Soil radionuclide results from the Former E Pond subarea are presented in Table 2-3. Refer to Figure 2-3 for the locations of the soil samples.

2.5.2 Former E-Pond Subarea Summary

The highest activities from the Former E Pond subarea were observed in the following areas:

- From E-JS01, the highest activities occurred at 1-3 feet bgs for radium-228, however, the highest activities were detected at 5-7 feet bgs for radium-226, uranium-234 and 235. Equal activities of uranium-238 were measured at 1-3 feet bgs and 5-7 feet bgs.
- From E-JS02, the highest activities occurred at 0-1 feet bgs for radium-228 and at 1-3 feet bgs for radium-226, uranium-234, 235, and 238.

2.6 Former Evaporation Pond Subarea

The following samples were analyzed for radionuclides in the Former Evaporation Pond subarea:

- Six soil samples from borings at 2 JS sample locations

The two soil borings advanced in the Former Evaporation Pond subarea were located in the footprint of the former evaporative pond. According to the December 2012 SSCR, the two soil borings were advanced until refusal, which occurred at 8 feet bgs at EV-JS02 and 9 feet bgs at EV-JS01, using the direct-push Geoprobe® drilling rig. As stated in the December 2012 SSCR, overlying soils generally consisted of loose silty sands with layers of cobble-size fill material (URS, 2012).

2.6.1 Soil Radionuclide Results

COIs in samples collected from the Former Evaporation Pond area were detected at activities above the reporting limit. Radium-226 was detected at activities in soil ranging from 0.43 to 5.2 pCi/g in the Former Evaporation Pond subarea. The average detected activity of radium-226 in soil was 2.4 pCi/g. Radium-228 was detected at

activities in soil ranging from 1.5 to 3.8 pCi/g and the average detected activity was 2.3 pCi/g.

In the Former Evaporation Pond subarea uranium-234 was detected at activities in soil ranging from 2 to 6.1 pCi/g. The average detected activity of uranium-234 in soil was 3.2 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.069 to 0.4 pCi/g and the average detected activity was 0.21 pCi/g. Uranium-238 was detected at activities in soil ranging from 2 to 6.6 pCi/g and the average detected activity was 3.4 pCi/g. Soil radionuclide results from the Former Evaporation Pond subarea are presented in Table 2-4. Sample results are provided in Figure 2-4.

2.6.2 Former Evaporation Pond Subarea Summary

The highest activities from the subarea were observed in the following areas:

- Soil sample EV-JS01 generally contained the highest activities of isotopic uranium and radium in the 5-7 feet bgs sample interval for the Former Evaporation Pond subarea. However, highest activity at EV-JS01 occurred at 1-3 feet bgs for radium-226.
- From EV-JS02, the highest activities occurred at 1-3 feet bgs for radium-226 and radium-228 and from 5-7 feet bgs for uranium-234, 235, and 238.

2.7 Old D Pond Subarea

The following soil and sediment samples were analyzed for radionuclides in the Old D Pond for radionuclides:

- Six soil samples from borings at 3 JS sample locations
- 12 SD samples from borings at 6 SD sample locations

The three judgmental soil borings advanced in the Old D Pond subarea were located in the footprint of the former pond. Boring logs in the December 2012 SSCR stated the direct-push Geoprobe® drilling rig that collected soil and sediment samples from the subarea encountered refusal at bedrock at depths ranging from 3 to 9 feet bgs. According to the December 2012 SSCR, based on the three soil borings collected, bedrock appeared to be deeper in the southern edge of the pond. As stated in the

December 2012 SSCR, soils overlying bedrock generally consisted of loose silty sands with layers of cobble-sized fill material (URS, 2012).

Sediment sample from six locations within an unnamed wash were collected. According to the December 2012 SSCR, the wash is located in the drainage area of the Old D pond.

2.7.1 Soil Radionuclide Results

COIs in soil samples collected from the Old D Pond subarea were detected at activities above the reporting limits with the exception of uranium-235 at OD-JS01-0-1, OD-JS02-0-1, and OD-JS02-1-3. Radium-226 was detected at activities in soil ranging from 1.5 to 3.5 pCi/g in the Old D Pond subarea. The average detected activity of radium-226 in soil was 2.7 pCi/g. Radium-228 was detected at activities in soil ranging from 1.2 to 3.5 pCi/g and the average detected activity was 2.2 pCi/g.

In the Old D Pond subarea uranium-234 was detected at activities in soil ranging from 1.8 to 3 pCi/g. The average detected activity of uranium-234 in soil was 2.5 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.12 to 0.17 pCi/g and the average detected activity was 0.15 pCi/g. Uranium-238 was detected at activities in soil ranging from 2 to 3 pCi/g and the average detected activity was 2.6 pCi/g. Refer to Figure 2-5 for the locations of the soil samples. Sample results are provided in Figure 2-6.

2.7.2 Sediment Radionuclide Results

Twelve sediment samples were collected from six locations relative to the Old D Pond, two were northwest, samples OD-SD01 and OD-SD02, one was north, OD-SD03, one was west, OD-SD04, and two were southwest, OD-SD05 and OD-SD06. COI activities were detected above the reporting limit, with the exception of uranium-235. Only two samples collected from the Old D Pond subarea had COI activities above the reporting limit for uranium-235, OD-SD03-0-1.5 and OD-SD05-1.5-3.

Radium-226 was detected at activities in sediment ranging from 0.64 to 2.9 pCi/g in the Old D Pond subarea. The average detected activity of radium-226 in sediment was 2.1 pCi/g. Radium-228 was detected at activities in sediment ranging from 1.6 to 3.2 pCi/g and the average detected activity was 2.5 pCi/g.

In the Old D Pond subarea uranium-234 was detected at activities in sediment ranging from 1.6 to 4.5 pCi/g. The average detected activity of uranium-234 in sediment was 2.8 pCi/g. Uranium-235 was detected at activities in sediment ranging from 0.23 to 0.31 pCi/g and the average detected activity was 0.27 pCi/g. Uranium-238 was detected at activities in sediment ranging from 1.6 to 4.8 pCi/g and the average detected activity was 2.9 pCi/g. Refer to Figure 2-5 for the locations of the sediment samples. Sample results are provided in Figure 2-6.

2.7.3 Old D Pond Subarea Summary

The highest activities from the subarea were observed in the following areas:

- An area located on the north and southeastern discharge areas of the Old D Pond, characterized by sediment sample locations OD-SD-05, OD-SD-06, and OD-SD-03. At OD-SD-03 and OD-SD-06, uranium-234 and 238 activities were greatest in the 1.5-3 feet bgs sample interval, however at OD-SD-05, activities for those analytes were greatest in the surface sample, collected from 0 -1.5 feet bgs. OD-SD-06 contained the highest radium-226 activities, observed at 0-1.5 and 1.5-3 feet bgs.
- An area located within the Old D Pond footprint, characterized by samples OD-JS-01, OD-JS-02, and OD-JS-03. OD-JS02 had the highest activities of radium-226 in the soil sample collected from 0-1 feet bgs and from 1-3 feet bgs. Uranium-234 and 238 were detected at the highest activities in surface samples, 0-1 feet bgs, collected from OD-JS01 and OD-JS03 and from OD-JS02-5-7.

2.8 Former Esperanza Mill Subarea

The following soil and sediment samples were analyzed for radionuclides in the Former Esperanza Mill subarea:

- 24 random grid soil samples from soil borings at 9 locations
- Two soil samples from 1 JS sample locations

Sediment sample depths ranged from 0 to 3 feet bgs and soil sample depths ranged between 0 to 11 feet bgs. According to the December 2012 SSCR, soil samples were collected using a direct-push Geoprobe® drilling rig and encountered refusal at depths of 4-12 feet bgs. As stated in the December 2012 SSCR, bedrock outcroppings are

visible in some areas. Overlaying bedrock materials generally consist of fill or sandy silts to silty sands (URS, 2012). Refer to Figure 2-7 for the locations of the soil samples

2.8.1 Soil Radionuclide Results

Radium-226, uranium-234, and uranium-238 were detected above the laboratory reporting limit in each sample collected. Radium-228 was not detected above the laboratory reporting limit in one sample, X26-1-3. Uranium-235 was not detected above the laboratory reporting limit in the following samples: C22-0-1, E24-0-1, E24-1-3, P24-0-1, P24-5-7, K24-5-7 and H22-1-3.

Radium-226 was detected at activities in soil ranging from 0.54 to 3.5 pCi/g in the Former Esperanza Mill subarea. The average detected activity of radium-226 in soil was 2.0 pCi/g. Radium-228 was detected at activities in soil ranging from 1 to 3 pCi/g and the average detected activity was 2.0 pCi/g.

In the Former Esperanza Mill subarea uranium-234 was detected at activities in soil ranging from 0.85 to 3.3 pCi/g. The average detected activity of uranium-234 in soil was 2.0 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.056 to 0.25 pCi/g and the average detected activity was 0.11 pCi/g. Uranium-238 was detected at activities in soil ranging from 0.9 to 3.4 pCi/g and the average detected activity was 2.0 pCi/g.

Refer to Figure 2-7 for the locations of the soil samples. Sample results are provided in Figure 2-8.

2.8.2 Former Esperanza Mill Subarea Summary

The highest activities generally occurred in the following area:

- An area located within the central portion of the subarea, between the Former Laydown Yard subarea and the Former C Pond subarea, was characterized by samples P24, M26, and EM-JS01. In this area, the deepest soil sample interval collected from each sample location, generally exhibited the highest activity of isotopic radium and uranium.
- Additionally, the activity of radium-226 collected from the X26 in the 0-1 feet bgs sample interval had the highest activity detected in the subarea.

2.9 Former C Pond and C Pond Spoils Subarea

The following soil samples were analyzed for radionuclides in the Former C Pond and C Pond Spoils:

- Three random grid soil samples from a soil boring at 1 grid location
- 32 soil samples from 11 soil borings at JS sample locations

The grid soil samples location, U25, collected from Former C Pond Spoils subarea, originated from the randomly selected node on the 200-foot grid applied to the Former Esperanza Mill subarea. The sample depth intervals ranged between 0 to 5.5 feet bgs.

Three judgmental sample locations were located in the Former C Pond Spoils subarea, five judgmental sample locations were located in the Former C Pond subarea, and three judgmental sample locations were located just outside of the subareas boundaries. Sample depths from judgmental sample locations ranged from 0 to 16 feet bgs.

According to the December 2012 SSCR, the soils overlying bedrock generally consist of loose silty sands to sandy gravel. Refer to Figure 2-9 for the locations of the soil samples (URS, 2012).

2.9.1 Soil Radionuclide Results

Radium-226, uranium-234, and uranium-238 were detected above the laboratory reporting limit in each sample collected. Radium-228 was not detected above the laboratory reporting limit in one sample, C-JS04-0-1. Uranium-235 was not detected above the laboratory reporting limit in two samples, CS-JS01-1-3 and CS-JS02-0-1.

Radium-226 was detected at activities in soil ranging from 0.67 to 5.1 pCi/g in the Former C Pond and C Pond Spoils subarea. The average detected activity of radium-226 in soil was 2.2 pCi/g. Radium-228 was detected at activities in soil ranging from 1.3 to 5.2 pCi/g and the average detected activity was 2.4 pCi/g.

In the Former C Pond and C Pond Spoils subarea, uranium-234 was detected at activities in soil ranging from 1.3 to 6.6 pCi/g. The average detected activity of uranium-234 in soil was 2.3 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.071 to 0.34 pCi/g and the average detected activity was 0.13 pCi/g. Uranium-238

was detected at activities in soil ranging from 1.4 to 6.6 pCi/g and the average detected activity was 2.4 pCi/g. Sample results are provided in Figure 2-10.

2.9.2 Former C Pond Subarea and Former C Pond Spoils Subarea Summary

The highest activities generally occurred in the following areas:

- An area encompassing the northwest portion of the Former C Pond subarea and the northern portion of the Former C Pond Spoils subarea, was characterized by CS-JS01, CS-JS05, and U25. The highest activities in samples collected from the Former C Pond subarea for radium-226 and 228 and uranium-234, 235, and 238 were observed in soil samples collected from U25-5-5.5, and CS-JS05-1-3.
- An area encompassing the central and southern portions of the Former C Pond subarea, was characterized by C-JS02, C-JS03, C-JS04, and C-JS05. Elevated isotopic uranium activities were observed in C-JS02-1-3, C-JS02-5-7, C-JS03-10-12, C-JS03-15-17, and C-JS04-10-12. Isotopic uranium activities generally increased with depth at these soil sample locations, with the exception of C-JS04, where the 15-16 feet bgs soil sample activities were less than the 10-12 feet bgs soil sample activities.

2.10 Former Raffinate Pond Subarea

The following soil and sediment samples were analyzed for radionuclides in the Former Raffinate Pond for radionuclides:

- 13 soil samples (including two duplicates) from soil borings at 5 JS sample locations
- Nine sediment samples (including five duplicates) from soil borings at 2 SD locations

The sample borings were located within the footprint of the Former Raffinate Pond and according to the December 2012 SSCR, were advanced to the top of bedrock using a direct-push Geoprobe® drilling rig, with the exception of RA-JS02 which was collected with a hand auger. As stated in the December 2012 SSCR, the soils overlying bedrock generally consisted of loose silty sands with layers of cobble-sized fill material (URS, 2012). Refer to Figure 2-11 for the locations of the soil and sediment samples.

2.10.1 Soil Radionuclide Results

Radium-226, uranium-234, uranium-235, and uranium-238 were detected above the laboratory reporting limit in each sample collected. Radium-228 was not detected above the laboratory reporting limit in two samples, RA-JS01-0-1 and RA-SD01-0-1.5D. The majority of the samples did not have uranium-235 activities detected above the reporting limit, with the following exceptions: RA-JS01-1-3, RA-JS02-0-1D, RA-JS02-1-3, RA-JS03-0-1, RA-JS05-0-1, RA-SD01-0-1.5D, RA-SD01-1.5-3D, RA-SD02-1.5-3D, RA-SD02-1.5-3D.

Radium-226 was detected at activities in soil ranging from 0.84 to 5.8 pCi/g in the Former Raffinate Pond subarea. The average detected activity of radium-226 in soil was 2.6 pCi/g. Radium-228 was detected at activities in soil ranging from 1.7 to 14 pCi/g and the average detected activity was 3.9 pCi/g.

In the Former Raffinate Pond subarea, uranium-234 was detected at activities in soil ranging from 1.5 to 5.3 pCi/g. The average detected activity of uranium-234 in soil was 2.7 pCi/g. Uranium-235 was detected at activities in soil ranging from 0.092 to 0.21 pCi/g and the average detected activity was 0.17 pCi/g. Uranium-238 was detected at activities in soil ranging from 1.6 to 5.2 pCi/g and the average detected activity was 2.7 pCi/g.

2.10.2 Sediment Radionuclide Results

Radium-226, uranium-234, and uranium-238 were detected above the laboratory reporting limit in each sediment sample collected. Radium-228 was not detected above the laboratory reporting limit in one sample, RA-SD01-0-1.5D. Uranium-235 was not detected above the laboratory reporting limit in RA-SD02-0-1.5D.

Radium-226 was detected at activities in sediment ranging from 1.7 to 3.9 pCi/g in the Former Raffinate Pond subarea. The average detected activity of radium-226 in sediment was 2.5 pCi/g. Radium-228 was detected at activities in sediment ranging from 1.1 to 3.8 pCi/g and the average detected activity was 1.8 pCi/g.

In the Former Raffinate Pond subarea, uranium-234 was detected at activities in sediment ranging from 1 to 4.7 pCi/g. The average detected activity of uranium-234 in sediment was 2.2 pCi/g. Uranium-235 was detected at activities in sediment ranging from 0.061 to 0.15 pCi/g and the average detected activity was 0.10 pCi/g. Uranium-

238 was detected at activities in sediment ranging from 0.92 to 4.3 pCi/g and the average detected activity was 2.2 pCi/g.

2.10.3 Former Raffinate Pond Subarea Summary

The highest soil sample activity of radium-226 was collected at RA-JS03-0-1. The highest radium-228, uranium-234, and uranium-238 soil sample activity occurred at RA-JS02-1-3D, a duplicate of RA-JS02-1-3. The highest soil sample activity for uranium-235, occurred at RA-JS01-1-3.

The highest sediment sample activity for radium-226, radium-228, uranium-234 and uranium-238 collected from the Former Raffinate Pond subarea were collected from RA-SD01-1.5-3.0D. The highest sediment sample activity for uranium-235 occurred at RA-SD01-0-1.5 D. Sample results are provided in Figure 2-12.

2.11 Former Laydown Yard Subarea

The following soil samples were analyzed for radionuclides in the Former Laydown Yard subarea:

- 16 soil samples (including 1 duplicate) from soil borings at four JS sample locations.

According to the December 2012 SSCR, borings were generally advanced to refusal at bedrock, which was located between 3.5 and 15 feet bgs. As stated in the December 2012 SSCR, the top eight feet of fill was characterized as dry, loose, silty sand and below eight feet the fill material was characterized as black stained silty sand possessing a hydrocarbon odor (URS, 2012).

2.11.1 Soil Radionuclide Results

COIs in soil samples were detected at activities above the analytical reporting limit except for uranium-235 at EM-JS08-1-3D.

Radium-226 was detected at activities in sediment ranging from 5 to 1 pCi/g in the Former Laydown Yard subarea. The average detected activity of radium-226 in sediment was 2.5 pCi/g. Radium-228 was detected at activities in sediment ranging from 4.6 to 1.1 pCi/g and the average detected activity was 2.4 pCi/g.

In the Former Laydown Yard subarea, uranium-234 was detected at activities in sediment ranging from 0.93 to 12 pCi/g. The average detected activity of uranium-234 in sediment was 3.9 pCi/g. Uranium-235 was detected at activities in sediment ranging from 0.042 to 0.57 pCi/g and the average detected activity was 0.19 pCi/g. Uranium-238 was detected at activities in sediment ranging from 0.96 to 13 pCi/g and the average detected activity was 4.0 pCi/g. Refer to Figure 2-13 for the locations of the soil samples. Sample results are provided in Figure 2-14.

2.11.2 Former Laydown Yard Subarea Summary

In general, activities were highest in soil samples collected from intervals that were near bedrock and where visually impacted soil was observed. The highest radium-226 activity occurred at EM-JS07-15-16. The highest activity radium-228 activity occurred at EM-JS06-10-11. The highest uranium-234 activities occurred at EM-JS07-15-16 and EM-JS08-10-12. The highest activities for uranium-235 and uranium-238 occurred at EM-JS08-10-12 and EM-JS07-15-16, respectively.

2.12 Former Rhenium Ponds Subarea

The following soil samples were analyzed for radionuclides in the Former Rhenium Pond subarea for radionuclides:

- 10 soil samples (including one duplicate) from soil borings at two JS locations

Both judgmental sample locations were within the footprint of the Former Rhenium Ponds. According to the December 2012 SSCR, soil borings were advanced to a depth of 20 feet bgs and bedrock was not encountered at either boring location. As stated in the December 2012 SSCR, the upper material generally consisted of silt with sand to silty sand and the deeper materials consisted of well sorted, gray silt with sand (URS, 2012).

2.12.1 Soil Radionuclide Results

Target radionuclide analytes were detected above the reporting limit with the exception of uranium-235 at RP-JS01-5-7, RP-JS01-0-1, RP-JS01-1-3, RP-JS02-5-7, RP-JS02-10-12, and RP-JS02-15-17. The highest radium-226 soil sample activity occurred at RP-JS01-10-12 and RP-JS02-15-17.

Radium-226 was detected at activities in sediment ranging from 0.71 to 2.8 pCi/g in the Former Rhenium Pond subarea. The average detected activity of radium-226 in sediment was 2.2 pCi/g. Radium-228 was detected at activities in sediment ranging from 0.82 to 1.9 pCi/g and the average detected activity was 1.6 pCi/g.

In the Former Rhenium Pond subarea, uranium-234 was detected at activities in sediment ranging from 0.7 to 3.1 pCi/g. The average detected activity of uranium-234 in sediment was 1.5 pCi/g. Uranium-235 was detected at activities in sediment ranging from 0.046 to 0.1 pCi/g and the average detected activity was 0.06 pCi/g. Uranium-238 was detected at activities in sediment ranging from 0.8 to 3.2 pCi/g and the average detected activity was 1.5 pCi/g. Refer to Figure 2-15 for the locations and sample results from the soil samples

2.12.2 Former Rhenium Pond Subarea Summary

In general, activities in the Former Rhenium Pond subarea were moderate. The highest activities were observed in the 10-12 and 15-17 feet bgs sample intervals.

3. Quality Assurance/ Quality Control

3.1 Analytical Data Packages

The analytical laboratory reports for the soil and sediment samples analyzed for radionuclides are provided in Appendix A. Data tables were prepared using EDDs provided by ALS in a spreadsheet format. However, while populating the EDDs in the spreadsheet format, in some cases, the analytical data results did not retain the correct significant figures. For instance, results that contained trailing zeroes did not have those trailing zeroes included in the reported data. Results are reported using the values in the EDDs.

3.2 Data Verification

Analytical results for soil and sediment samples analyzed for radionuclides were verified in accordance with the methods and procedures identified in Section 5.2 of the QAPP (URS, 2008b). Deviations from the Work Plan have been documented in URS (2012), and in Section 2.6 for radiological-specific samples. The laboratory reports and field notes were reviewed by URS to ensure accuracy and to explain any inconsistencies that were identified between the Work Plan and analytical results. This data verification summary is included in Appendix B.

To determine ultimate usability of the data, laboratory reports from both the radionuclides and metals investigation were submitted to Laboratory Data Consultants, Inc. (LDC) for review and the addition of data qualifiers used to qualify the analytical results associated with quality control parameters outside of the established data quality objectives. The data qualifiers added by LDC are defined below:

- J The analyte was positively identified; however, the result should be considered an estimated value.
- UJ The analyte was not positively identified. The reporting limit is considered an estimated value.
- U The analyte was not positively identified above the Minimum Detectable Concentration (MDC)

Tables 2-2 through 2-10 contain the data qualifiers added by LDC to the radionuclide soil and sediment analytical results. Appendix C contains the data qualifiers added by LDC to the total metals soil and sediment analytical results.

Based on the results of the verification of the radionuclide soil and sediment data, LDC adjusted the MDC for several of the analytes which indicated that results should be reported as not detected. Samples that were determined to be not detected contain a “U” validation data qualifier.

3.3 Data Validation

According to the QAPP, a third party EPA Level IV data validation was required for ten percent of the data packages. Two data packages of radionuclide data were sent to LDC for EPA Level IV data validation to satisfy this requirement including one data package, ALS report 0812177, which contained soil and sediment radionuclide results. The LDC EPA Level IV data validation report is included in Appendix D. The other radionuclide package for solids was for rock core results and will be discussed in the groundwater characterization report.

3.4 Field Duplicate Sample Evaluation

Field duplicates are generally collected during the field investigation to assess how conditions in the field affect the precision of sample analytical results and provide information about heterogeneity of a particular sample location. Soil and sediment field duplicates were collected in succession from the same sample source and device

and the original sample and the field duplicate were not homogenized, according to the QAPP (URS, 2008b).

A total of nine soil and sediment duplicates were collected and analyzed during the investigation program. Although the number of duplicates collected is less than the 38 duplicates specified in the Work Plan, far fewer primary samples were collected than originally intended due to shallow bedrock depths. The nine duplicates were collected to represent 182 primary soil and sediment samples. Therefore, one duplicate was collected for approximately every 20 samples (one duplicate per every 20.2 primary samples). This satisfies the Work Plan requirement of one duplicate sample collected and analyzed for every 20 primary samples of a given matrix.

The relative percent differences (RPDs) between the field duplicate and its associated sample were calculated and are presented in Table 3-1. The RPD is a measure of precision calculated by the following formula:

$$RPD = |X_1 - X_2| / X_{avg}$$

Where:

X_1 and X_2 are the observed activity values

X_{avg} is the average activity, and

$|X_1 - X_2|$ is the absolute value of the difference between observed values

Field duplicate evaluation procedures for soil and sediment samples were not specified in the Work Plan or QAPP/Sampling and Analysis Plan addendum (URS 2008a, URS 2008b). For consistency, the same criteria used in the SSCR were used to evaluate soil and sediment samples analyzed for radionuclides. The field duplicates and parent samples were evaluated by the following criteria:

- If both analytes were detected at an activity greater than or equal to five times the MDC, the RPD should be less than 50 percent.

- If one or both analytes were detected at an activity that is less than five times the MDC, then the difference between the sample and the field duplicate should not exceed the four times the MDC.
- Duplicate RPDs are calculated by dividing the difference of the activities by the average of the activities.

Field duplicate RPDs were within acceptance limits with the following exceptions:

- Radium-226 values for RP-JS02-1-3 and its field duplicate RP-JS02-1-3D were both not above five times the MDC and the absolute difference between the values was greater than four times the MDC; therefore, data were qualified “J” to indicate a potential bias.
- Radium-226 values for RA-JS02-1-3 and its field duplicate RA-JS02-1-3D were below five times the MDC and the absolute difference between the values was greater than four times the MDC; therefore, data were qualified “J” to indicate a potential bias.

3.5 Performance Evaluation Samples

The Work Plan (URS, 2008a) suggested that the submission of performance evaluation samples may be required if there were unexpected or unexplained sample results, or if continued quality issues were detected through the data verification/validation process. None of these issues were identified during the sampling effort; therefore, no performance samples were submitted to the laboratory for evaluation.

4. Results Evaluation

The results of the soil and sediment characterization will be further evaluated in a baseline human health risk assessment (BHHRA), including comparison to appropriate screening levels and background levels.

Mr. Billy Doris
Freeport McMoRan Sierrita
6200 W. Duval Mine Road
Green Valley AZ 85614

Re: ALS Paragon Workorder: 08-12-175
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Doris:

Twenty soil samples were received from Freeport McMoRan Sierrita on December 17, 2008. The samples were scheduled for the following analyses:

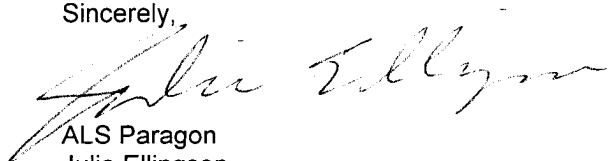

Isotopic Uranium pages 1-33
Gamma Spectroscopy pages 1-41

Radium-228 by Method 9320 pages 1-11
226Radium by EPA Method 903.1 (m) pages 1-24

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

JME/mh

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Re: ALS Paragon Workorder: 08-12-175
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Vaughn:

Twenty soil samples were received from Freeport McMoRan Sierrita on December 17, 2008. The samples were scheduled for the following analyses:

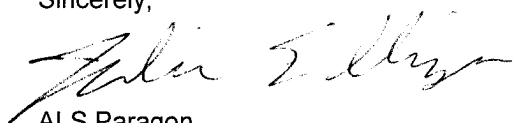

Isotopic Uranium pages 1-33
Gamma Spectroscopy pages 1-41

Radium-228 by Method 9320 pages 1-11
226Radium by EPA Method 903.1 (m) pages 1-24

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

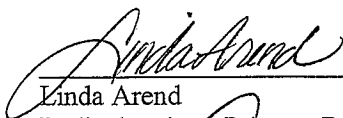

Work Order Number: 0812175

1. The following report consists of analytical results for 18 soil samples received by ALS Paragon on 12/17/08.
2. The samples were prepared according to procedure SOP739R9. Samples 0812175-4, -12, -13, -14, -15, -16, and -18 were sealed in steel cans on 12/24/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/14/09 is at least 97.8%. Conservatively, assuming a radon emanation efficiency of approximately 50% the effective radon progeny in-growth for these samples would be greater than 98.9%. The remaining samples in the work order were packed in standard 100 gram geometry and analyzed for ^{228}Ra only.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/14/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volumes were insufficient to allow preparation of duplicates. A duplicate analysis of sample 0812175-2 was performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the associated samples.
7. The library used for calibration and analysis for samples 0812175-4, -12, -13, -14, -15, -16, and -18 employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium.

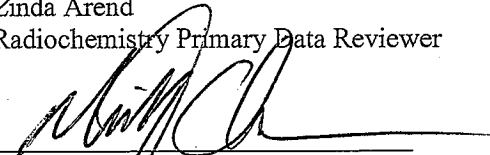

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than or greater than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for samples 0812175-3, -9, -10, -15, -17, and the results for sample 0812175-3 may be biased low. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. Due to the nature of electronics involved in gamma spectroscopy, any detector acquiring data with the same multi-channel buffer (MCB) is affected by all other detector inputs in that same MCB. A high activity calibration source was counting in detector 4, which is in the same MCB as detector 3. Sample 0812175-17 was counted in detector 3 on 01/13/09. Thus, the observed dead time for this sample count was greater than 10% at 12.58%. Analyst review of the data does not indicate a problem with the spectral acquisition for this sample. Results are submitted without further qualification. Please refer to QASS 360429.
11. The requested detection limit of 1 pCi/gram for ^{228}Ra was not met for samples 0812175-2DUP, -4, -5, -6, -9, -12, -16, -17, and -20, as identified with an "M3" qualifier on the final reports. The reported activity for these samples is greater than the achieved detection limit. Results are submitted without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JMEWorkorder No: 0812175
Initials: LJO Date: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u> NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u> NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	<u>YES</u>	YES NO
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<u>YES</u>	YES NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Samples #19 and 20 (CP-N08-1-3 and CP-N08-5-7) The samples have ID labels and also have all the ID information written on the lids. For samples 19 and 20, The label for sample 19 matches the lid on sample 20; the label for sample 20 matches the lid on 19. use bottle labels

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: emailProject Manager Signature / Date: [Signature] 12/22/08

*IR Gun #2: Oakton, SN 29922500201-0066

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

QUALITY ASSURANCE SUMMARY SHEET

65081218-2
 PAR W.O. # / BATCH 0812175, 0812176
 TEST γ-SPEC
 METHOD γ-SCAN
 SOP/REV (PREP) —
 SOP/REV (ANAL) 713

Briefly document any QA or other problems or deviations associated with the analysis of samples. Problems could result from: log-in, color, odor, dilution, consistency, scheduling, equipment, or instrumentation, or may include documentation of minor deviations necessary due to unique DQO's or sample characteristics.

MC 01/26/09
 Samples 0812175-17 and 0812176-3 were counted on 1/13/09 in detector 3. The observed dead time for the sample counts was greater than 10%, at 12.58% and 12.28%, respectfully. During the spectral acquisition of these samples, a high activity calibration source was counting in detector 4. This detector is in the same multi-channel buffer (MCB) as detector 3. Due to the nature of the electronics involved in gamma spectroscopy, any detector acquiring data within the same MCB is affected by all other detector inputs in that MCB. Thus, the source activity in detector 4 caused an increase in the dead time observed for the entire MCB containing detectors 3 and 4. Analyst review of the raw data does not indicate any problems with the spectral acquisition for these samples. All data quality objectives were met and the results are submitted without further qualification. *MC 01/26/09*

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	0.019 +/- 0.35	0.68	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
M - Requested MDC not met.
B - Analyte concentration greater than MDC.
B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	2.3 +/- 0.61	0.87	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

15262-20-1	Ra-228	2.0 +/- 0.52	0.90	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812175

1. This report consists of the analytical results for 20 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, a reduce aliquot of ~1 g was taken on all samples. To ensure the proper oxidation state of Pu and to prevent bleed-through, 3 drops of NaNO₂ were added to all samples.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 01/23/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

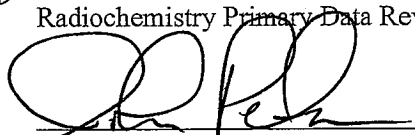

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JMEWorkorder No: 0812175
Initials: LJO Date: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES	NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES	NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Samples #19 and 20 (CP-N08-1-3 and CP-N08-5-7) The samples have ID labels and also have all the ID information written on the lids. For samples 19 and 20, The label for sample 19 matches the lid on sample 20; the label for sample 20 matches the lid on 19. use bottle labels

If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick Smith Date/Time: emailProject Manager Signature / Date: [Signature] 12/22/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812175

1. This report consists of the analytical results for two soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The samples were analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analyses were completed on 01/29/09.
4. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil samples from this work order were initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. ICP-AES measurement of barium concentrations prior to chemical separation for samples 0812175-8 and -11 showed concentrations less than the amount known to have been added to the samples in the form of barium carrier. To avoid a low bias in the final analytical results the known concentration of the carrier was used in chemical yield calculations in lieu of the pre-separation measurement.
7. No further anomalous situations were noted during the preparation and analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

XH FTCA**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

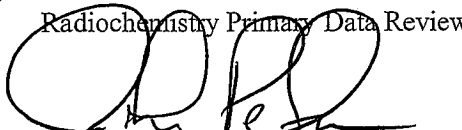

Work Order Number: 0812175

1. This report consists of the analytical results for 13 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared and analyzed according to procedures SOP783R8 and SOP336R0. The analyses were completed on 02/27/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The radiometric recovery for the matrix spike of sample 0812175-7 is above the upper control limit of 126% at 171%, as indicated with an "N" qualifier on the final report. All other quality control criteria have been met. ALS does not control on matrix spike recovery. The results for this sample are considered an estimated value and are included in this data package.
5. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JmeWorkorder No: 0812176
Initials: LJO Date: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u> NO
3. Are Custody seals on sample containers intact?	<u>NONE</u> YES	NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<u>YES</u>	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<u>N/A</u> YES	NO
9. Are all aqueous non-preserved samples pH 4-9?	<u>N/A</u> YES	NO
10. Is there sufficient sample for the requested analyses?	<u>YES</u>	NO
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	YES	<u>NO</u> *
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: _____ < green pea _____ > green pea	<u>N/A</u> YES	NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u> YES	NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u> YES	NO
17. Were the samples shipped on ice?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>RAD ONLY</u> YES	<u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Samples CP-SD-08-0-1.5 and EM-C22-5-7 were received broken. PM notified.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: _____Project Manager Signature / Date: [Signature] 12/22/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812176

1. The following report consists of analytical results for 18 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812176-5, -6, -12, and -12DUP were sealed in steel cans on 12/24/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/14/09 is at least 97.8%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.9%. The remaining samples in the work order were packed in standard 100 gram geometry and analyzed for ^{228}Ra only.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/14/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volumes were insufficient to allow preparation of duplicates. A duplicate analysis of sample 0812176-4, -12, and -13 was performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples.
7. The library used for calibration and analysis for samples 0812176-5, -6, -12, and -12DUP employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. Due to the nature of electronics involved in gamma spectroscopy, any detector acquiring data with the same multi-channel buffer (MCB) is affected by all other detector inputs in that same MCB. A high activity calibration source was counting in detector 4, which is in the same MCB as detector 3. Sample 0812176-3 and the laboratory control sample associated with batch GS090106-3 were counted in detector 3 on 01/13/09. Thus, the observed dead time for these samples count was greater than 10% at 12.28% and 10.63%. Analyst review of the data does not indicate a problem with the spectral acquisition for these samples. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. Results are submitted without further qualification. Please refer to QASS 360429 and 360430.
11. The requested detection limit of 1 pCi/gram for ^{228}Ra was not met for samples 0812176-2, -5, -7, -8, -9, -10, -15, -16, -17, and -18, as identified with an "M3" qualifier on the final reports. The reported activity for these samples is greater than the achieved detection limit. Results are submitted without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812176Project Manager: JmeInitials: LJODate: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u>
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<u>YES</u>	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u>
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES
10. Is there sufficient sample for the requested analyses?	<u>YES</u>	NO
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>RAD ONLY</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. sec Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

★ Samples CP-SD-08-0-1.5 and EM-C22-5-7 were received broken. PM notified.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: Project Manager Signature / Date: Jme 12/22/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

QUALITY ASSURANCE SUMMARY SHEET

PAR W.O. # / BATCH 0812175, 0812176
TEST γ-SPEC
METHOD γ-SCAN
SOP/REV (PREP) —
SOP/REV (ANAL) 713

Briefly document any QA or other problems or deviations associated with the analysis of samples. Problems could result from: log-in, color, odor, dilution, consistency, scheduling, equipment, or instrumentation, or may include documentation of minor deviations necessary due to unique DQO's or sample characteristics.

MC 01/26/09
Samples 0812175-17 and 0812176-3 were counted on 1/13/09 in detector 3. The observed dead time for the sample counts was greater than 10%, at 12.58% and 12.28%, respectfully. During the spectral acquisition of these samples, a high activity calibration source was counting in detector 4. This detector is in the same multi-channel buffer (MCB) as detector 3. Due to the nature of the electronics involved in gamma spectroscopy, any detector acquiring data within the same MCB is affected by all other detector inputs in that MCB. Thus, the source activity in detector 4 caused an increase in the dead time observed for the entire MCB containing detectors 3 and 4. Analyst review of the raw data does not indicate any problems with the spectral acquisition for these samples. All data quality objectives were met and the results are submitted without further qualification. MC 01/26/09

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	2.2 +/- 0.42	0.49	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

15262-20-1	Ra-228	1.7 +/- 0.52	0.92	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 halfives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

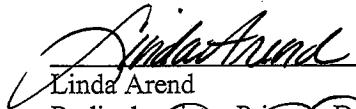

Work Order Number: 0812176

1. This report consists of the analytical results for 18 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. To reduce potential matrix interference, a reduced aliquot of ~1g was taken for all the samples. Due to the amount of high activity detected in the pre-screen, samples 0812176-4 and -7 were prepared at a greater reduced aliquot of ~0.5g. To prevent any potential bleed through of Pu, 3 drops of NaNO₂ were added to all the samples.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 01/30/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-235 activity is reported in the associated method blank above the minimum detectable concentration value, as indicated with a "B3" qualifier on the final report. The measured blank activity is below the requested MDC of 0.1 pCi/gram. Results are acceptable according to SOP715R15, and are submitted without further qualification.

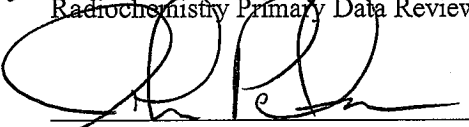

7. The requested MDC of 0.1 pCi/gram was not met for ^{234}U and ^{238}U for sample 0812176-4, as indicated with an "M3" qualifier on the final report. The reported activity for this sample is greater than the achieved MDC. Results are submitted without further qualification.
8. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: FreeportWorkorder No: 0812176Project Manager: JmeInitials: LJODate: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u>
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<u>YES</u>	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u>
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES
10. Is there sufficient sample for the requested analyses?	<u>YES</u>	NO
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>RAD ONLY</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. sec Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

★ Samples CP-SD-08-0-1.5 and EM-C22-5-7 were received broken. PM notified.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: Project Manager Signature / Date: Jme 12/22/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812176

1. This report consists of the analytical results for 15 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared and analyzed according to procedures SOP783R8 and SOP336R0. The analyses were completed on 03/04/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Linda Arend
Radiochemistry Primary Data Reviewer

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812176Project Manager: JmeInitials: LJO Date: 12/17/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u>
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<u>YES</u>	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u>
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES
10. Is there sufficient sample for the requested analyses?	<u>YES</u>	NO
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>RAD ONLY</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. sec Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

★ Samples CP-SD-08-0-1.5 and EM-C22-5-7 were received broken. PM notified.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: Project Manager Signature / Date: Jme 12/22/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Result Units: pCi/g
File Name: Manual Entry

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	2.5 +/- 0.83	0.69	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

Work Order Number: 0812177

1. The following report consists of analytical results for 19 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812177-2, -2DUP, -3, -5, -6, -7, -10, and -16 were sealed in steel cans on 12/24/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/15/09 is at least 97.8%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.9%. The remaining samples in the work order were packed in standard 100 gram geometry and analyzed for ^{228}Ra only.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/15/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volumes were insufficient to allow preparation of duplicates. A duplicate analysis of sample 0812177-2 was performed in lieu of a prepared duplicate.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples.
7. The library used for calibration and analysis for samples 0812177-2, -2DUP, -3, -5, -6, -7, -10, and -16 employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium.

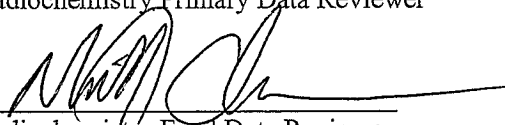

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. Due to the nature of electronics involved in gamma spectroscopy, any detector acquiring data with the same multi-channel buffer (MCB) is affected by all other detector inputs in that same MCB. A high activity calibration source was counting in detector 4, which is in the same MCB as detector 3. GS090106-3LCS was counted in detector 3 on 01/13/09. Thus, the observed dead time for this sample count was greater than 10% at 10.63%. Analyst review of the data does not indicate a problem with the spectral acquisition for this sample. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. Results are submitted without further qualification. Please refer to QASS 360430.
11. The requested detection limit of 1 pCi/gram for ^{228}Ra was not met for samples 0812177-3, -7, -9, -11, -14, -15, and -17, as identified with an "M3" qualifier on the final reports. The reported activity for these samples is greater than the achieved detection limit. Results are submitted without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Briefly document any QA or other problems or deviations associated with the analysis of samples. Problems could result from: log-in, color, odor, dilution, consistency, scheduling, equipment, or instrumentation, or may include documentation of minor deviations necessary due to unique DQO's or sample characteristics.

MC
01/28/09

The laboratory control sample GS090106-3LCS was counted on 1/13/09 in detector 3. The observed dead time for the count of the laboratory control sample was greater than 10%, at 10.63%. During the spectral acquisition of this source, a high activity calibration source was counting in detector 4. This detector is in the same multi-channel buffer (MCB) as detector 3. Due to the nature of the electronics involved in gamma spectroscopy, any detector acquiring data within the same MCB is affected by all other detector inputs in that MCB. Thus, the source activity in detector 4 caused an increase in the dead time observed for the entire MCB containing detectors 3 and 4. Analyst review of the raw data does not indicate any problems with the spectral acquisition for these samples. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. All data quality objectives were met and the results are submitted without further qualification.

CASNO	Target Nuclide	Results +/- 2s TPU	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
13982-63-3	Ra-226	451 +/- 52.9	2.97	470	96.0	85 - 115	P,M3

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 halflives.

13982-63-3	Ra-226	2.7 +/- 0.44	0.49	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812177

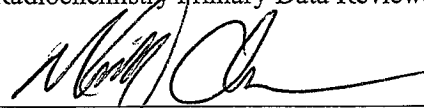

1. This report consists of the analytical results for 20 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to possible matrix interference, all samples were prepared at a reduced aliquot of ~1 g. Due to high activity detected in the prescreen, samples 0812177-8, -10, -11, -12, and -14 were prepared at a reduced aliquot of ~0.5 g and ~0.25 g for samples -13 and -20.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/10/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. The requested MDC of 0.1 pCi/gram was not met for U-234 and U-238 for several samples. The reported activity for these samples is greater than the achieved MDC. These samples are identified with an "M3" flag on the final reports.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Count Time: 1000 minutes

Final Aliquot: 0.830 g

Result Units: pCi/g

File Name: Spectrum #1

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13966-29-5	U-234	0.015 +/- 0.018	0.028	0.1	U
15117-96-1	U-235	0.010 +/- 0.016	0.027	0.1	U
7440-61-1	U-238	0.0043 +/- 0.019	0.036	0.1	U

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	5.442	4.59	pCi/g	84.4	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

M - Requested MDC not met.

B - Analyte concentration greater than MDC.

B3 - Analyte concentration greater than MDC but less than Requested MDC.

Radium-226 by EPA Method 903.1(m) Case Narrative

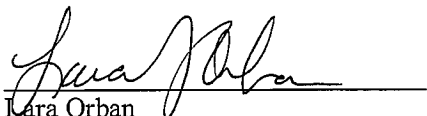

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812177

1. This report consists of the analytical results for thirteen soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/12/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

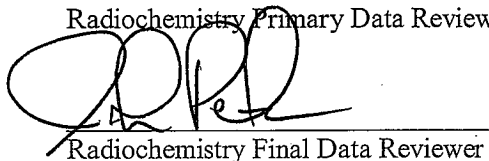

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812177Project Manager: JEInitials: COT Date: 12-17-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES	NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES	NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES <input type="radio"/> NO / NA (If no. see Form 008.)

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812177

1. This report consists of the analytical results for one soil sample received by ALS Paragon on 12/17/08.
2. This sample was prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The sample was analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analysis was completed on 01/29/09.
4. The analysis results for this sample are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil sample from this work order was initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. ICP-AES measurement of barium concentrations prior to chemical separation for sample 0812177-13 showed concentrations less than the amount known to have been added to the sample in the form of barium carrier. To avoid a low bias in the final analytical results the known concentration of the carrier was used in chemical yield calculations in lieu of the pre-separation measurement.
7. No further anomalous situations were noted during the preparation and analysis of this sample. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

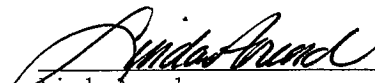

Work Order Number: 0812178

1. The following report consists of analytical results for 16 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812178-1, -9, -11, -13, -15, -16, -18, and -18DUP were sealed in steel cans on 12/24/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/15/09 is at least 97.8%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.9%. The remaining samples in the work order were packed in standard 100 gram geometry and analyzed for ^{228}Ra only.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/15/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volumes were insufficient to allow preparation of duplicates. A duplicate analysis of samples 0812178-5 and -18 was performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples.
7. The library used for calibration and analysis for samples 0812178-1, -9, -11, -13, -15, -16, -18, and -18DUP employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium.

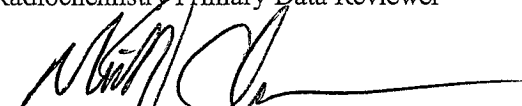

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. Due to the nature of electronics involved in gamma spectroscopy, any detector acquiring data with the same multi-channel buffer (MCB) is affected by all other detector inputs in that same MCB. A high activity calibration source was counting in detector 4, which is in the same MCB as detector 3. GS090106-3LCS was counted in detector 3 on 01/13/09. Thus, the observed dead time for this sample count was greater than 10% at 10.63%. Analyst review of the data does not indicate a problem with the spectral acquisition for this sample. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. Results are submitted without further qualification. Please refer to QASS 360430.
11. The requested detection limit of 1 pCi/gram for ^{228}Ra was not met for samples 0812178-1, -3, -4, -5, -5DUP, -6, and -15, as identified with an "M3" qualifier on the final reports. The reported activity for these samples is greater than the achieved detection limit. Results are submitted without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FREEDORTWorkorder No: 0812178Project Manager: JEInitials: CDT Date: 12-17-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF <input checked="" type="radio"/> YES	NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES	NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES	NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <input checked="" type="radio"/> <u>#4</u> <input checked="" type="radio"/> RAD ONLY	YES	<input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>15</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

If applicable, was the client contacted? YES / NO / NA Contact: _____ Date/Time: _____

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

SOP/REV (ANAL)

713

Briefly document any QA or other problems or deviations associated with the analysis of samples. Problems could result from: log-in, color, odor, dilution, consistency, scheduling, equipment, or instrumentation, or may include documentation of minor deviations necessary due to unique DQO's or sample characteristics.

MC
01/28/09

The laboratory control sample GS090106-3LCS was counted on 1/13/09 in detector 3. The observed dead time for the count of the laboratory control sample was greater than 10%, at 10.63%. During the spectral acquisition of this source, a high activity calibration source was counting in detector 4. This detector is in the same multi-channel buffer (MCB) as detector 3. Due to the nature of the electronics involved in gamma spectroscopy, any detector acquiring data within the same MCB is affected by all other detector inputs in that MCB. Thus, the source activity in detector 4 caused an increase in the dead time observed for the entire MCB containing detectors 3 and 4. Analyst review of the raw data does not indicate any problems with the spectral acquisition for these samples. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. All data quality objectives were met and the results are submitted without further qualification.

CASNO	Analyte	Sample Result +/- 2s TPU	Duplicate Result +/- 2s TPU	DER	Control Limit	Lab Qualifiers
13982-63-3	Ra-226	2.6 +/- 0.48	2.5 +/- 0.45	0.14	2.13	G

Comments:

Duplicate Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

LT - Result is less than Request MDC, greater than sample specific MDC

M - Requested MDC not met.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS, Matrix Spike Recovery within control limits.

N - Matrix Spike Recovery outside control limits

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812178

1. This report consists of the analytical results for 18 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. To avoid possible matrix interference, an aliquot of ~1 g was taken for all the samples. Due to activity detected in the prescreen data, sample 0812178-15 was prepared at a reduced aliquot of ~0.5g.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/09/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-234 activity is reported in the associated method blank above the minimum detectable concentration value, as indicated with a "B3" qualifier on the final report. The measured blank activity is below the requested MDC of 0.1 pCi/gram. Results are acceptable according to SOP715R15, and are submitted without further qualification.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

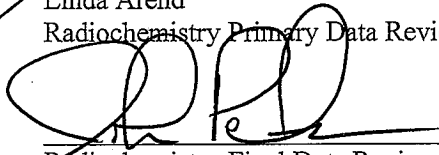

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Report Basis: Dry Weight

Final Aliquot: 1.02 g
Prep Basis: Dry Weight
Moisture(%): NA
Result Units: pCi/g
File Name: Spectrum #1

CASNO	Analyte	Sample Result +/- 2s TPU	Duplicate Result +/- 2s TPU	DER	Control Limit	Lab Qualifiers
13966-29-5	U-234	2.7 +/- 0.51	2.4 +/- 0.45	0.43	2.13	
15117-96-1	U-235	0.21 +/- 0.087	0.14 +/- 0.067	0.56	2.13	
7440-61-1	U-238	2.6 +/- 0.50	2.7 +/- 0.50	0.13	2.13	

Comments:

Duplicate Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

LT - Result is less than Request MDC, greater than sample specific MDC

M - Requested MDC not met.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS, Matrix Spike Recovery within control limits.

N - Matrix Spike Recovery outside control limits

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

ALS Paragon

Radium-226 by EPA Method 903.1(m) Case Narrative

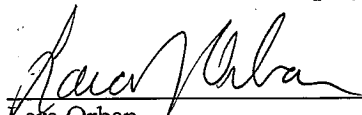

Freeport McMoRan Sierrita

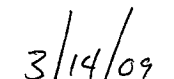

FMI-VRP

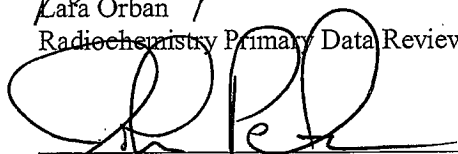

Work Order Number: 0812178

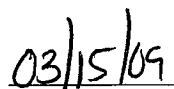

1. This report consists of the analytical results for eleven soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/12/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: FREEDORTWorkorder No: 0812178Project Manager: JEInitials: CDT Date: 12-17-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF <input checked="" type="radio"/> YES	NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES	NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES	NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <input checked="" type="radio"/> <u>#4</u> <input checked="" type="radio"/> RAD ONLY	YES	<input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>15</u>		
Background µR/hr reading: <u>13</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

If applicable, was the client contacted? YES / NO / NA Contact: _____ Date/Time: _____Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

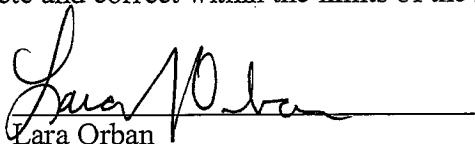

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812178

1. This report consists of the analytical results for two soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The samples were analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analyses were completed on 01/29/09.
4. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil samples from this work order were initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. ICP-AES measurement of barium concentrations prior to chemical separation for samples 0812178-2 and -2Dup showed concentrations less than the amount known to have been added to the samples in the form of barium carrier. To avoid a low bias in the final analytical results the known concentration of the carrier was used in chemical yield calculations in lieu of the pre-separation measurement.
7. No further anomalous situations were noted during the preparation and analysis of these samples. All remaining quality control criteria were met.

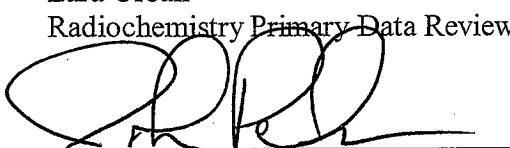

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Green Valley AZ 85614

Re: ALS Paragon Workorder: 08-12-207
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

Nineteen soil samples were received from Freeport McMoRan Sierrita on December 17, 2008.
The samples were scheduled for the following analyses.

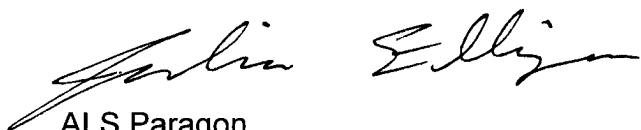

Isotopic Uranium pages 1-25
Gamma Spectroscopy pages 1-54

Radium-228 by Method 9320 pages 1-9
Radium-226 by EPA Method 903.1 (m) pages 1-18

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Work Order Number: 0812207

1. This report consists of the analytical results for six soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/12/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Project Manager: JmeWorkorder No: 0812207
Initials: WJO Date: 12/26/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES
9. Are all aqueous non-preserved samples pH 4-9?	<input checked="" type="radio"/> N/A	YES
10. Is there sufficient sample for the requested analyses?	YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>10</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #4 (RA-JS-05-1-3) Sample time on ID label 0947.
 #11 (RA-SD-02-1.5-3.0) Sample ID on label RA-SD-02-1.5-3.0MS.
 * One 16 oz WMG jar received for all samples. Filled 20% - 100%.
 + Sample #1 (RA-JS-04-0-1) was received with a broken lid. Lid replaced.

If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick Smith Date/Time: _____Project Manager Signature / Date: [Signature] 12/23/08

80524**CO-US****DEN****XH FTCA****After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

FMI-VRP

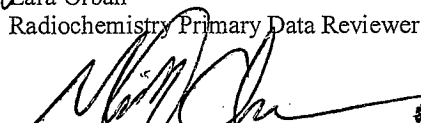

Work Order Number: 0812207

1. This report consists of the analytical results for one soil sample received by ALS Paragon on 12/20/08.
2. This sample was prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The sample was analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analysis was completed on 01/29/09.
4. The analysis results for this sample are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil sample from this work order was initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of this sample. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812207

1. This report consists of the analytical results for 14 soil samples received by ALS Paragon on 12/20/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to possible matrix interference, these samples were prepared at a reduced aliquot of ~1 gram.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/21/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-235 activity is reported in the associated method blank above the minimum detectable concentration value. The measured blank activity is below the requested MDC of 0.1 pCi/gram. Results are acceptable according to SOP715R15, and are submitted without further qualification.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

Work Order Number: 0812207

1. The following report consists of analytical results and supporting documentation for 13 soil samples received by ALS Paragon on 12/17/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812207-1, -9, -11, -12, -14, -17, and -19 were sealed in steel cans on 12/30/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. Sample 0812207-5 was sealed in a steel can on 01/02/09 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/20/09 and 01/23/09, respectively, is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/26/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of a duplicate in batch GS090109-6. A duplicate analysis of sample 0812207-5 was performed in lieu of a prepared duplicate.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812207-1, -5, -9, -11, -12, -14, -17, and -19.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812207-1, -5, -9, -11, -12, -14, -17, and -19.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for samples 0812207-3, -4, -8, -9, -9DUP, -11, -14, -17, and -19. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. There are cases where the magnitude of negative activity is greater than the 2σ TPU. Under typical conditions, where background data is normally distributed and analyzed by paired observations, this event is likely to occur at least 2.5% of the time. Review of the data does not indicate a problem with the instrument or reporting systems and results are reported without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JmeWorkorder No: 0812207
Initials: LJO Date: 12/26/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES
9. Are all aqueous non-preserved samples pH 4-9?	<input checked="" type="radio"/> N/A	YES
10. Is there sufficient sample for the requested analyses?	YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>10</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #4 (RA-JS-05-1-3) Sample time on ID label 0947.
 #11 (RA-SD-02-1.5-3.0) Sample ID on label RA-SD-02-1.5-3.0MS.
 * One 16 oz WMG jar received for all samples. Filled 20% - 100%.
 + Sample #1 (RA-JS-04-0-1) was received with a broken lid. Lid replaced.

If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick Smith Date/Time: _____Project Manager Signature / Date: [Signature] 12/23/08

80524**CO-US****DEN****XH FTCA****After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	0.030 +/- 0.22	0.40	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
M - Requested MDC not met.
B - Analyte concentration greater than MDC.
B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

CASNO	Target Nuclide	Results +/- 2s TPU	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
13982-63-3	Ra-226	452 +/- 53.0	2.54	470	96.2	85 - 115	P,M3

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

15262-20-1	Ra-228	1.1 +/- 0.60	1.1	1	M3,G,TI

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Re: ALS Paragon Workorder: 08-12-208
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

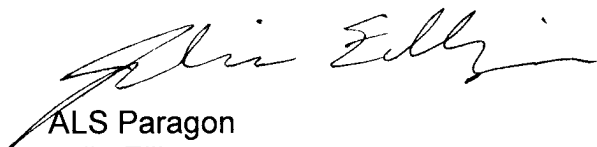

Twenty-seven soil samples were received from Freeport McMoRan Sierrita on December 17, 2008. The samples were scheduled for the following analyses.

Isotopic Uranium	pages 1-44
Gamma Spectroscopy	pages 1-57
Radium-226 by EPA Method 903.1 (m)	pages 1-30

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

Client: Free portWorkorder No: 0812208Project Manager: JmeInitials: LJODate: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u>
3. Are Custody seals on sample containers intact?	<u>NONE</u>	<u>YES</u>
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	<u>NO</u>
5. Are the COC and bottle labels complete and legible?	<u>YES</u>	<u>NO</u>
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u>
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<u>N/A</u>	<u>YES</u>
9. Are all aqueous non-preserved samples pH 4-9?	<u>N/A</u>	<u>YES</u>
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	<u>NO</u>
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	<u>NO</u>
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: _____ < green pea _____ > green pea	<u>N/A</u>	<u>YES</u>
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	<u>YES</u>
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	<u>YES</u>
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>RAD ONLY</u>	<u>YES</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>13</u>		
Background µR/hr reading: <u>10</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no, see Form 008.)		

+ see page 2 of 2

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812208

1. This report consists of the analytical results for 14 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/11/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The radiometric recovery for the matrix spike of sample 0812208-13 is above the upper control limit of 126% at 131%. All other quality control criteria have been met. ALS Paragon does not control on matrix spike recovery. The result for this sample is considered an estimated value and is included in this data package
5. The duplicate error ratio (DER) for sample 0812208-22 and its duplicate was elevated above our warning limit of 1.42 at 1.79. DER is defined as:

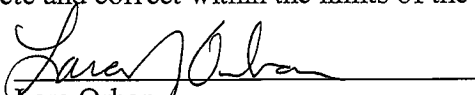

$$DER = \frac{|S - D|}{2 * \sqrt{S_s^2 + S_d^2}}$$

Where: S = sample result, D = duplicate result, σ_s = 1 sigma uncertainty of sample result, and σ_D = 1 sigma uncertainty of the duplicate result. Results are acceptable according to SOP715R15.

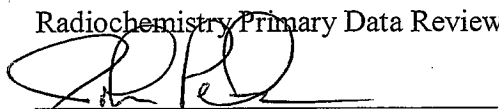

6. No further anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: Free port
Project Manager: JmeWorkorder No: 0812208
Initials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u> NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u> *
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u> a
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> + see page 2 of 2
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>13</u>		
Background µR/hr reading: <u>10</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Samples #17 and 26 (EM-JS-08-1-3D and EM-JS-08-1-3) No sample time was listed on the ID labels.

Sample #9 (RA-JS-05-0-1) Sample time on ID label 0947.

• One 16oz WMG was received for all samples filled 20% - 100%.

If applicable, was the client contacted? YES / NO / NA Contact: Rich Smith Date/Time: pmProject Manager Signature / Date: [Signature] 12/23/08

*IR Gun #2: Oakton, SN 29922500201-0066

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

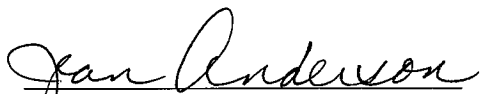

Work Order Number: 0812208

1. This report consists of the analytical results for 25 soil samples received by ALS Paragon on 12/20/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to activity detected in prescreen and to reduce possible matrix interference, the samples were prepared at a reduced aliquot of ~1 gram or less..
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/23/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-238 activity is reported in method blank AS090210-3MB and U-235 activity is reported in method blank AS090217-1MB above the minimum detectable concentration value. The measured blank activity is below the requested MDC of 0.1 pCi/g. Results are acceptable according to SOP715R15, and are submitted without further qualification.
7. The requested MDC of 0.1 pCi/g was not met for U-238 for sample 0812208-21 and U-234 for sample 0812208-22. The reported activity for these samples is greater than the achieved MDC. These samples are identified with an "M3" flag on the final reports.
8. No further anomalous situations were encountered during the preparation or analysis of these

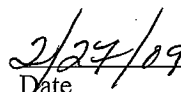

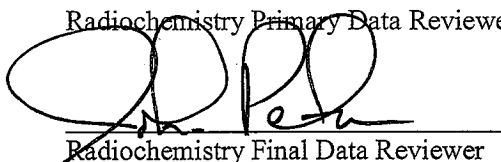

samples. All remaining quality control criteria were met.

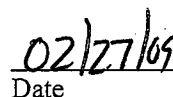

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

File Name: Spectrum #1

CASNO	Target Nuclide	Results +/- 2s TPU	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
13966-29-5	U-234	6.39 +/- 1.06	0.0404	6.16	104	82 - 122	P
7440-61-1	U-238	6.33 +/- 1.05	0.0463	6.40	98.9	82 - 122	P

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	6.414	4.21	pCi/g	65.6	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

Work Order Number: 0812208

1. The following report consists of analytical results and supporting documentation for 25 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812208-3, -4, -5, -8, -10, -17, -19, -21, -23, -24, and -26 were sealed in steel cans on 12/30/08 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/20/09 is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/21/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of duplicates in batches GS090106-4 and GS090106-5. Duplicate analyses of samples 0812208-2 and -14 were performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812208-3, -4, -5, -8, -10, -17, -19, -21, -23, -24, and -26.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812208-3, -4, -5, -8, -10, -17, -19, -21, -23, -24, and -26.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for many of the samples associated with this work order. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: Free port
Project Manager: JmeWorkorder No: 0812208
Initials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u> NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u> *
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u> a
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> + see page 2 of 2
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>13</u>		
Background µR/hr reading: <u>10</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Samples #17 and 26 (EM-JS-08-1-3D and EM-JS-08-1-3) No sample time was listed on the ID labels.

Sample #9 (RA-JS-05-0-1) Sample time on ID label 0947.

• One 16oz WMG was received for all samples filled 20% - 100%.

If applicable, was the client contacted? YES / NO / NA Contact: Rich Smith Date/Time: pmProject Manager Signature / Date: [Signature] 12/23/08

*IR Gun #2: Oakton, SN 29922500201-0066

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 halflives.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	2.8 +/- 0.53	0.69	1	G

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Re: ALS Paragon Workorder: 08-12-210
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

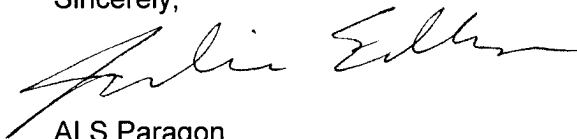

Twenty soil samples were received from Freeport McMoRan Sierrita on December 17, 2008. The samples were scheduled for the following analyses.

Isotopic Uranium	pages 1-30	Radium-228 by Method 9320	pages 1-9
Gamma Spectroscopy	pages 1-42	Radium-226 by EPA Method 903.1 (m)	pages 1-26

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812210

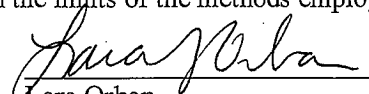

1. This report consists of the analytical results for 14 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/11/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The duplicate error ratio (DER) for sample 0812210-9 and its duplicate was elevated above our warning limit of 1.42 at 1.88. DER is defined as:

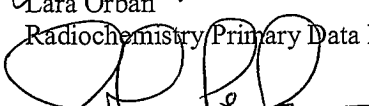

$$DER = \frac{|S - D|}{2 * \sqrt{\sigma_s^2 + \sigma_D^2}}$$

Where: S = sample result, D = duplicate result, σ_s = 1 sigma uncertainty of sample result, and σ_D = 1 sigma uncertainty of the duplicate result. Results are acceptable according to SOP715R15.

5. No further anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

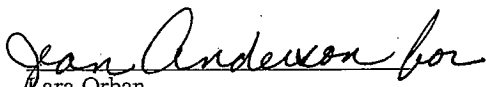

Freeport McMoRan Sierrita

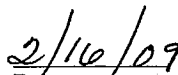

FMI-VRP

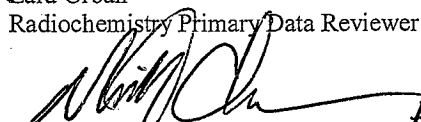

Work Order Number: 0812210

1. This report consists of the analytical results for one soil sample received by ALS Paragon on 12/20/08.
2. This sample was prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in this sample.
3. The sample was analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analysis was completed on 01/29/09.
4. The analysis results for this sample are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil sample from this work order was initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of this sample. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: FreeportWorkorder No: 0812210Project Manager: JmeInitials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u> *
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> +
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source: note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4 <u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>14</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #15 (RA-SD-02-0-1.5MS) Sample ID on label RA-SD-01-0-1.5MS.
 • One 16 oz WRG received for all samples Filled 20% - 90%.
 + Samples #10 and 9 (EM-025-1-3 and EM-025-0-1) received with broken lids, lids replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pmProject Manager Signature / Date: [Signature] 12/23/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812210

1. This report consists of the analytical results for 17 soil samples received by ALS Paragon on 12/20/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, the samples were prepared at a reduced aliquot of ~1 gram. A further reduced aliquot of ~0.5 gram was taken for sample 0812210-6 due to high activity seen in prescreen.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/21/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. The requested MDC of 0.1 pCi/g was not met for U-234 for sample 0812210-18. The reported activity for this sample is greater than the achieved MDC. This sample is identified with an "M3" flag on the final reports.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: Freeport
Project Manager: JmeWorkorder No: 0812210
Initials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u> *
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> +
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source: note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4 <u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>14</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #15 (RA-SD-02-0-1.5MS) Sample ID on label RA-SD-01-0-1.5MS.
 • One 16 oz WRG received for all samples Filled 20% - 90%.
 + Samples #10 and 9 (GM-025-1-3 and GM-025-0-1) received with broken lids, lids replaced.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Analyte	Sample Result +/- 2s TPU	Duplicate Result +/- 2s TPU	DER	Control Limit	Lab Qualifiers
13966-29-5	U-234	1.2 +/- 0.27	1.2 +/- 0.27	0.02	2.13	
15117-96-1	U-235	0.078 +/- 0.050	0.074 +/- 0.049	0.05	2.13	LT
7440-61-1	U-238	1.3 +/- 0.28	1.1 +/- 0.24	0.52	2.13	

Comments:

Duplicate Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

LT - Result is less than Request MDC, greater than sample specific MDC

M - Requested MDC not met.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS, Matrix Spike Recovery within control limits.

N - Matrix Spike Recovery outside control limits

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812210

1. The following report consists of analytical results and supporting documentation for 16 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812210-3, -11, and -16 were sealed in steel cans on 01/02/09 and 12/30/08, respectively, and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/23/09 and 01/20/09 is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/26/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of a duplicate in batch GS090106-5. Duplicate analysis of sample 0812210-1 was performed in lieu of a prepared duplicate.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812210-3, -11, and -16.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812210-3, -11, and -16.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for many of the samples associated with this work order. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> +
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source: note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4 <u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>14</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #15 (RA-SD-02-0-1.5MS) Sample ID on label RA-SD-01-0-1.5MS.
 • One 16 oz WRG received for all samples Filled 20% - 90%.
 + Samples #10 and 9 (GM-025-1-3 and GM-025-0-1) received with broken lids, lids replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pmProject Manager Signature / Date: [Signature] 12/23/08

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Analyte	Sample Result +/- 2s TPU	Duplicate Result +/- 2s TPU	DER	Control Limit	Lab Qualifiers
15262-20-1	Ra-228	2.4 +/- 0.64	2.1 +/- 0.61	0.32	2.13	M3

Comments:

Duplicate Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

LT - Result is less than Request MDC, greater than sample specific MDC

M - Requested MDC not met.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS, Matrix Spike Recovery within control limits.

N - Matrix Spike Recovery outside control limits

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Re: ALS Paragon Workorder: 08-12-211
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

Nineteen soil samples were received from Freeport McMoRan Sierrita on December 20, 2008. The samples were scheduled for the following analyses.

Isotopic Uranium	pages 1-32
Gamma Spectroscopy	pages 1-45
Radium-228 by Method 9320	pages 1-9

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

Client: FreeportWorkorder No: 0812Z11Project Manager: JmcInitials: LJODate: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> / NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample # 12 (CS-JS-02-1-3) Sample ID on label CS-JS-01-1-3. - Date & Time matched
 * All samples only one 16 oz WMG received Filled 25% - 100%. used COC ID
 + Samples #1 and 5 (CS-JS-03-5-7 and CS-JS-01-5-7) were received with broken lids. Lids were replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pmProject Manager Signature / Date: [Signature] 12/23/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Radium-226 by EPA Method 903.1(m) Case Narrative

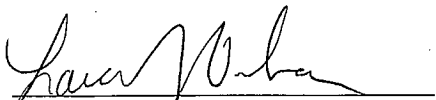

Freeport McMoRan Sierrita

FMI-VRP

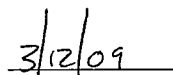

Work Order Number: 0812211

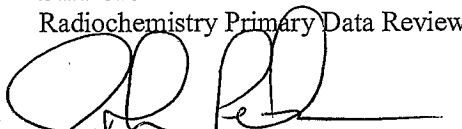

1. This report consists of the analytical results for eleven soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/11/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The radiometric recovery for the matrix spike of sample 0812211-4 is below the lower control limit of 57% at 52.2%. All other quality control criteria have been met. ALS Paragon does not control on matrix spike recovery. The result for this sample is considered an estimated value and is included in this data package.
5. No further anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

13982-63-3	Ra-226	44.3 +/- 8.18	0.223	42.8	104	57 - 126	P

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

ALS Paragon

Radium-228 by Method 9320 Case Narrative

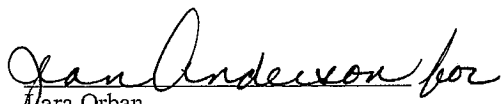

Freeport McMoRan Sierrita

FMI-VRP

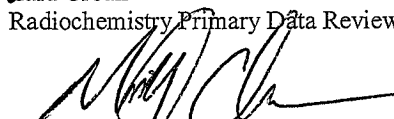

Work Order Number: 0812211

1. This report consists of the analytical results for one soil sample received by ALS Paragon on 12/20/08.
2. This sample was prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in this sample.
3. The sample was analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analysis was completed on 01/29/09.
4. The analysis results for this sample are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil sample from this work order was initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of this sample. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812211Project Manager: JmcInitials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #12 (CS-JS-02-1-3) Sample ID on label CS-JS-01-1-3. - Date & Jmc matched used COC ID

• All samples only one 16 oz WMG received Filled 25% - 100%.

+ Samples #1 and 5 (C-JS-03-5-7 and CS-JS-01-5-7) were received with broken lids. Lids were replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pmProject Manager Signature / Date: Jmc 12/23/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812211

1. This report consists of the analytical results for 19 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, the samples were prepared at a reduced ~1.0 gram aliquot. Three drops of NaNO₂ were added to the samples to prevent Pu bleed-through.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/27/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. U-234 and U-238 activity is reported in the associated method blank above the minimum detectable concentration value. The measured blank activity is below the requested MDC (0.1 pCi/g). Results are acceptable according to SOP715R15, and are submitted without further qualification. This sample is identified with "B3" flags on the final reports.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JmcWorkorder No: 0812211
Initials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #12 (CS-JS-02-1-3) Sample ID on label CS-JS-01-1-3. - Date & Jmc matched used COC ID

• All samples only one 16 oz WMG received Filled 25% - 100%.

+ Samples #1 and 5 (C-JS-03-5-7 and CS-JS-01-5-7) were received with broken lids. Lids were replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pm

Project Manager Signature / Date: [Signature] 12/23/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812211

1. The following report consists of analytical results and supporting documentation for 18 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedure SOP739R9. Sample 0812211-17 and samples 0812211-2, -3, -6, -7, -8, -9, and -13 were sealed in steel cans on 12/30/08 and 01/02/09, respectively, and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/23/09 and 01/21/09 is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/26/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of a duplicate in batch GS090106-6. Duplicate analysis of sample 0812211-1 was performed in lieu of a prepared duplicate.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812211-2, -3, -6, -7, -8, -9, -13, and -17.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812211-2, -3, -6, -7, -8, -9, -13, and -17.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for samples 0812211-1, -1DUP, -3, -4, -5, -15, -16, and -19. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	<u>NONE</u>	YES NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF <u>YES</u>	YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<u>RAD ONLY</u>	YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>0</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #12 (CS-JS-02-1-3) Sample ID on label CS-JS-01-1-3. - Date & Jmc matched used COC ID

• All samples only one 16 oz WMG received Filled 25% - 100%.

+ Samples #1 and 5 (C-JS-03-5-7 and CS-JS-01-5-7) were received with broken lids. Lids were replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: pm

Project Manager Signature / Date: [Signature] 12/23/08

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	-0.048 +/- 0.21	0.41	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
M - Requested MDC not met.
B - Analyte concentration greater than MDC.
B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	2.9 +/- 0.89	1.5	1	M3,G,TI

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 halfives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

March 12, 2009

Mr. Aaron Hilshorst
Freeport McMoRan Sierrita
6200 W. Duval Mine Road
Green Valley AZ 85614

Re: ALS Paragon Workorder: 08-12-212
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

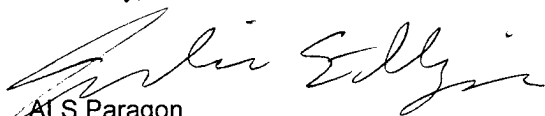

Seventeen soil samples were received from Freeport McMoRan Sierrita on December 20, 2008. The samples were scheduled for the following analyses.

Isotopic Uranium	pages 1-28
Gamma Spectroscopy	pages 1-49
Radium-226 by EPA Method 903.1(m)	pages 1-22

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

JME/eh

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-226 by EPA Method 903.1(m) Case Narrative

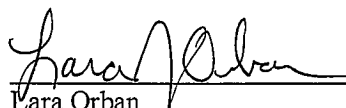

Freeport McMoRan Sierrita

FMI-VRP

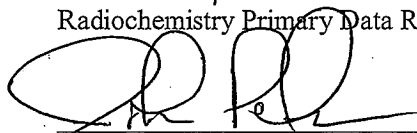

Work Order Number: 0812212

1. This report consists of the analytical results for 11 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/05/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CASNO	Target Nuclide	Matrix Spike	Sample Results	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
13982-63-3	Ra-226	54.0	1.9	0.653	43.2	121	57 - 126	P

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

N - Matrix Spike Recovery outside control limits

P - Matrix Spike Recovery within control limits

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

MDC - Minimum Detectable Concentration (see PAI SOP 709)

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812212

1. This report consists of the analytical results for 17 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, a reduced aliquot of ~1.0 gram was taken on all samples.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 02/25/09.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JMEWorkorder No: 0812212
Initials: LJO Date: 12/20/08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>NO</u>
2. Are custody seals on shipping containers intact?	NONE	<u>YES</u> NO
3. Are Custody seals on sample containers intact?	<u>NONE</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>YES</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>YES</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>NO</u> *
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>YES</u> NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>N/A</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>N/A</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>NO</u> •
11. Were all samples placed in the proper containers for the requested analyses?	<u>YES</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>YES</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<u>NO</u> +
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: _____ < green pea _____ > green pea	<u>N/A</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>N/A</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>N/A</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>NO</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>RAD ONLY</u> YES <u>NO</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Ambient</u>		
No. of custody seals on cooler: <u>1</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>14</u>	
	Background µR/hr reading: <u>10</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>YES</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

* Sample #9 (EM-M26-5-7) Sample time listed on ID label 1006.
 • Limited sample due to one 16oz WMG received for all tests (20 to 50% full)
 + Samples CS-JS-05-1-3 and C-JS-02-0-1 were received broken.
 Sample #2 (CS-JS-05-1-3D) Sample was received with a broken lid. Lid was replaced.

If applicable, was the client contacted? YES / NO / NA Contact: Rich Smith Date/Time: _____Project Manager Signature / Date: [Signature]

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

Work Order Number: 0812212

1. The following report consists of analytical results and supporting documentation for 17 soil samples received by ALS Paragon on 12/20/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812212-1, -3, -5, -9, -12, and -14 were sealed in steel cans on 12/30/08 and 01/02/09, respectively, and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/21/09 and 01/23/09 is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/26/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of duplicates in batches GS090106-6 and GS090109-6. Duplicate analyses of samples 0812212-2 and -14 were performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812212-1, -3, -5, -9, -12, and -14.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812212-1, -3, -5, -9, -12, and -14.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than (greater than for samples 0812212-2 and -2DUP) the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high (biased low for samples 0812212-2 and -2DUP) for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The laboratory control sample associated with batch GS090106-3 was counted on 01/13/09 in detector 3. The observed dead time for this sample count was greater than 10%, at 10.63%. Analyst review of the raw data does not indicate any problems with the spectral acquisition for this sample. All data quality objectives were met and the results are submitted without further qualification. Please see QASS 360430.
11. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for many of the samples associated with this work order. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
12. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

SOP/REV (ANAL)

713

Briefly document any QA or other problems or deviations associated with the analysis of samples. Problems could result from: log-in, color, odor, dilution, consistency, scheduling, equipment, or instrumentation, or may include documentation of minor deviations necessary due to unique DQO's or sample characteristics.

MC
01/28/09

The laboratory control sample GS090106-3LCS was counted on 1/13/09 in detector 3. The observed dead time for the count of the laboratory control sample was greater than 10%, at 10.63%. During the spectral acquisition of this source, a high activity calibration source was counting in detector 4. This detector is in the same multi-channel buffer (MCB) as detector 3. Due to the nature of the electronics involved in gamma spectroscopy, any detector acquiring data within the same MCB is affected by all other detector inputs in that MCB. Thus, the source activity in detector 4 caused an increase in the dead time observed for the entire MCB containing detectors 3 and 4. Analyst review of the raw data does not indicate any problems with the spectral acquisition for these samples. All radiometric recoveries were within the requested acceptance criteria of +/- 15%. All data quality objectives were met and the results are submitted without further qualification.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	-0.14 +/- 0.40	0.83	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
M - Requested MDC not met.
B - Analyte concentration greater than MDC.
B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Green Valley AZ 85614

Re: ALS Paragon Workorder: 08-12-251
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

Twenty-nine soil samples were received from Freeport McMoRan Sierrita on December 30, 2008. The samples were scheduled for the following analyses:

Isotopic Uranium	pages 1-52	Radium-228 by Method 9320	pages 1-10
Gamma Spectroscopy	pages 1-57	Radium-226 by EPA Method 903.1 (m)	pages 1-39

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

Paragon Analytics

Client: FreeportWorkorder No: 0812251Project Manager: JEInitials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	YES	<input checked="" type="radio"/> NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES <input type="radio"/> NO <input type="radio"/> NA (If no. see Form 008.)

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

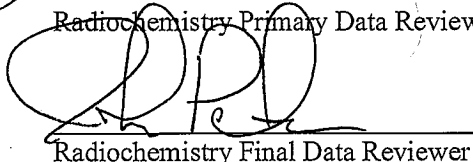

Work Order Number: 0812251

1. This report consists of the analytical results for 22 soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared and analyzed according to procedures SOP783R8. The analyses were completed on 03/11/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The magnitude of the negative activity for method blank RE090220-5MB is greater than the 2 sigma TPU. The analyst's review of the data does not indicate a problem with the instrument data or the subsequent reporting systems. The data quality is not believed to be affected and the results are submitted without qualification. Under typical conditions, where background level sample data is normally distributed and analyzed by paired observations, this event is likely to occur at least 2.5% of the time.
5. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812251Project Manager: JEInitials: LOT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	YES	<input checked="" type="radio"/> NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES <input type="radio"/> NO <input type="radio"/> NA (If no. see Form 008.)		

Additional Information: 8-5-08 PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

(28) L70791-10 Broken lids: 0812251-2 -16 no leakage detected
 (29) L70819-11 -3 -17
 post-it note ID's fell -4 -18 All samples are
 off and these are the -5 limited volume.
 ID's on a label on the bag -9

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

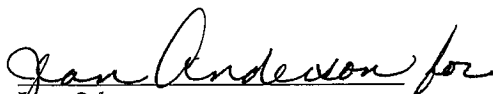

Freeport McMoRan Sierrita

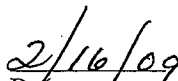

FMI-VRP

Work Order Number: 0812251

1. This report consists of the analytical results for one soil sample received by ALS Paragon on 12/30/08.
2. This sample was prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in this sample.
3. The sample was analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analysis was completed on 01/29/09.
4. The analysis results for this sample are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil sample from this work order was initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of this sample. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
BARIUM	36940	33300	ug	90.0	40 - 110 %	
YTTRIUM	8713	5900	ug	67.7	40 - 110 %	
Total				60.9	40 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812251

1. This report consists of the analytical results for 29 soil samples received by ALS Paragon on 12/30/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, the samples were prepared at a reduced aliquot of ~1 gram.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 03/07/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Sample 0812251-27 has a chemical recovery of 14.6%, below the 30% lower control limit. Spectral quality is adequate for accurate quantification. All remaining quality control criteria have been met. This sample is flagged with an "Y2" flag on the final reports. Please refer to NCR #11236.
7. Uranium-234 and U-238 activity is reported in method blank AS090220-3MB and U-234 activity is reported in method blank AS090223-1MB above the minimum detectable concentration value. The measured blank activity is below the requested MDC of 0.1 pCi/g. Results are acceptable according to SOP715R15, and are submitted without further qualification.

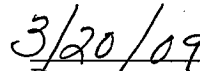

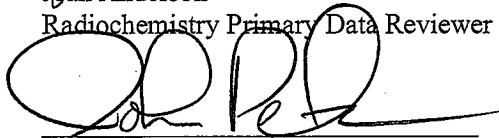

8. The requested MDC of 0.1 pCi/gram was not met for U-238 for samples 0812251-25 and -27. The reported activity for these samples is greater than the achieved MDC. These samples are identified with an "M3" flag on the final reports.
9. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CONTROLLED NON-CONFORMANCE REPORT

Non-Conformance

Initiated By: Erin M. Finsley on 3/12/2009

Event Type: Lab QC Criteria Not Met -- Chemical Yield

Event Explanation: Sample 0812251-27 has a chemical yield below the LCL of 30% at 14.6%. Spectral quality is adequate for accurate quantification. All remaining quality control criteria have been met.

Isotopic Uranium By Alpha Spectroscopy

PAI 714 Rev 11

Method Blank Results

Lab Name: ALS Paragon

Work Order Number: 0812251

Client Name: Freeport McMoRan Sierrita

ClientProject ID: FMI-VRP

Lab ID: AS090220-2MB

Sample Matrix: SOIL

Prep SOP: PAI 778 Rev 12

Date Collected: 20-Feb-09

Date Prepared: 20-Feb-09

Date Analyzed: 25-Feb-09

Prep Batch: AS090220-2

QCBatchID: AS090220-2-1

Run ID: AS090220-2A

Count Time: 300 minutes
