Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.376	3.61	pCi/g	82.6	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

M - Requested MDC not met.

B - Analyte concentration greater than MDC.

B3 - Analyte concentration greater than MDC but less than Requested MDC.

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita FMI-VRP

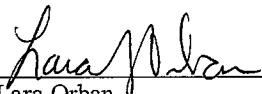

Work Order Number: 0812251

1. The following report consists of analytical results and supporting documentation for 28 soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812251-1 thru -3, -8, -9, -13, and -20 were sealed in steel cans on 01/07/09 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/28/09, respectively, is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/28/09.
4. The results for these samples are reported on a "Dry Weight" basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of duplicates in batches GS090108-2 and GS090108-4. Duplicate analyses of samples 0812251-2, -4, and -24 were performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812251-1 thru -3, -8, -9, -13, and -20.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812251-1 thru -3, -8, -9, -13, and -20.
8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.

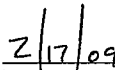

9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for many of the samples associated with this work order. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812251Project Manager: JEInitials: LOT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	YES	<input checked="" type="radio"/> NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<input checked="" type="radio"/> NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<input checked="" type="radio"/> RAD ONLY YES NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>14</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES <input type="radio"/> NO <input type="radio"/> NA (If no. see Form 008.)		

Additional Information: 8-5-08 PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	-0.32 +/- 0.42	0.85	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
M - Requested MDC not met.
B - Analyte concentration greater than MDC.
B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

Final Aliquot: 100 g

Result Units: pCi/g

File Name: 090133d09

CASNO	Target Nuclide	Results +/- 2s TPU	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
14596-10-2	Am-241	1110 +/- 130	3.03	986	112	85 - 115	P
10198-40-0	Co-60	479 +/- 56.1	1.75	455	105	85 - 115	P
10045-97-3	Cs-137	393 +/- 46.1	2.09	374	105	85 - 115	P

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	1.4 +/- 0.51	0.79	1	G,TI

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Re: ALS Paragon Workorder: 08-12-255
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

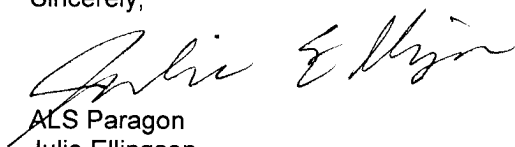

Twenty-four soil samples were received from Freeport McMoRan Sierrita on December 30, 2008. The samples were scheduled for the following analyses:

Isotopic Uranium	pages 1-40	Radium-228 by Method 9320	pages 1-11
Gamma Spectroscopy	pages 1-46	Radium-226 by EPA Method 903.1 (m)	pages 1-38

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

After printing this label:

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-226 by EPA Method 903.1(m) Case Narrative

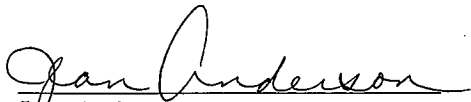

Freeport McMoRan Sierrita

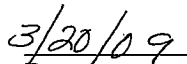

FMI-VRP

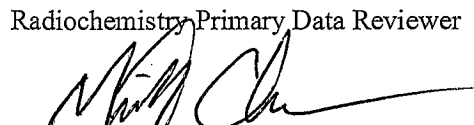

Work Order Number: 0812255

1. This report consists of the analytical results for 22 soil samples received by ALS Paragon on 12/30/2008.
2. These samples were prepared and analyzed according to procedures SOP783R8 and SOP336R0. The analyses were completed on 03/17/2009.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The magnitude of the negative activity for method blank RE090220-5MB is greater than the 2 sigma TPU at 2.26 sigma. The analyst's review of the data does not indicate a problem with the instrument data or the subsequent reporting systems. The data quality is not believed to be affected and the results are submitted without qualification. Under typical conditions, where background level sample data is normally distributed and analyzed by paired observations, this event is likely to occur at least 2.5% of the time.
5. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812255Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>(NO)</u>
2. Are custody seals on shipping containers intact?	NONE	<u>(YES)</u> NO
3. Are Custody seals on sample containers intact?	<u>(NONE)</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>(YES)</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>(YES)</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>(NO)</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>(YES)</u> NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<u>(N/A)</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9?	<u>(N/A)</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>(NO)</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>(YES)</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>(YES)</u>	YES NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	<u>CT 12-30-08</u> <u>(YES)</u>	<u>(NO)</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>(N/A)</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>(N/A)</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>(N/A)</u>	YES NO
17. Were the samples shipped on ice?	YES	<u>(NO)</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>(RAD ONLY)</u> YES <u>(NO)</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>(YES)</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

COC SAYS ST-SB01-20-40 label reads ET-SB01-20-40 - Times ARE both 1135 ^{-used} _{-COC}

COC READS ST-SB06-208-300 label reads ST-SB06 lid has 280-300 Times both 947

ST-SB06-260-280 has an MSD bottle

Broken Lids: 0812255-13 and -18 - no visible leakage

All bottles are limited volume

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: _____Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

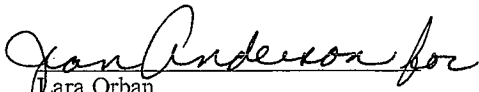

Freeport McMoRan Sierrita

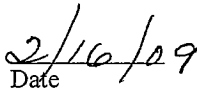

FMI-VRP

Work Order Number: 0812255

1. This report consists of the analytical results for two soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The samples were analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analyses were completed on 01/29/09.
4. The analyses results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil samples from this work order were initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of these samples. All quality control criteria were met.

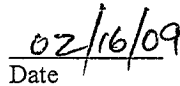

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812255Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>(NO)</u>
2. Are custody seals on shipping containers intact?	NONE	<u>(YES)</u> NO
3. Are Custody seals on sample containers intact?	<u>(NONE)</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>(YES)</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>(YES)</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>(NO)</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>(YES)</u> NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<u>(N/A)</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9?	<u>(N/A)</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>(NO)</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>(YES)</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>(YES)</u>	YES NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	CT <u>(YES)</u>	<u>(NO)</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>(N/A)</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<u>(N/A)</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>(N/A)</u>	YES NO
17. Were the samples shipped on ice?	YES	<u>(NO)</u>
18. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*: #2 #4	<u>(RAD ONLY)</u> YES <u>(NO)</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>(YES)</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

COC SAYS ST-SB01-20-40 label reads ET-SB01-20-40 - Times ARE both 1135 - used - COC ID

COC READS ST-SB06-208-300 label reads ST-SB06 lid has 280-300 Times both 947

ST-SB06-260-280 has an MSD bottle

Broken Lids: 0812255-13 and -18 - no visible leakage

All bottles are limited volume

If applicable, was the client contacted? YES / NO / NA Contact: Rick Smith Date/Time: Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Isotopic Uranium Case Narrative

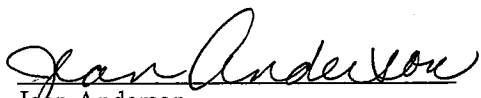

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812255

1. This report consists of the analytical results for 24 soil samples received by ALS Paragon on 12/30/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, the samples were prepared at a reduced aliquot of ~1 gram.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 03/11/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-234 activity is reported in method blank AS090223-1MB above the minimum detectable concentration value. The measured blank activity is below the requested MDC of 0.1 pCi/g. Results are acceptable according to SOP715R15, and are submitted without further qualification.
7. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Results +/- 2s TPU	MDC	Spike Added	% Rec	Control Limits	Lab Qualifier
13966-29-5	U-234	4.29 +/- 0.774	0.0445	4.20	102	82 - 122	P
7440-61-1	U-238	4.54 +/- 0.815	0.0300	4.36	104	82 - 122	P

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.369	3.56	pCi/g	81.4	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS Recovery within control limits.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812255

1. The following report consists of analytical results and supporting documentation for 22 soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812255-13 and -14 were sealed in steel cans on 01/07/09 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/28/09 is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 01/28/09.
4. The results for these samples are reported on a “Dry Weight” basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of duplicates in batches GS090108-3 and GS090109-7. Duplicate analyses of samples 0812255-1, -11, and -14 were performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812255-13 and -14.
7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812255-13 and -14.

8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for samples 0812255-3, -4, -7, -8, -10, -11DUP, -12, -16, -18, -23, and -24. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812255Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<u>(NO)</u>
2. Are custody seals on shipping containers intact?	NONE	<u>(YES)</u> NO
3. Are Custody seals on sample containers intact?	<u>(NONE)</u>	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<u>(YES)</u>	YES NO
5. Are the COC and bottle labels complete and legible ?	<u>(YES)</u>	YES NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	YES	<u>(NO)</u>
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<u>(YES)</u> NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<u>(N/A)</u>	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<u>(N/A)</u>	YES NO
10. Is there sufficient sample for the requested analyses?	YES	<u>(NO)</u>
11. Were all samples placed in the proper containers for the requested analyses?	<u>(YES)</u>	YES NO
12. Are all samples within holding times for the requested analyses?	<u>(YES)</u>	YES NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<u>CT 12-30-08</u> <u>(YES)</u>	<u>(NO)</u>
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<u>(N/A)</u>	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<u>(N/A)</u>	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<u>(N/A)</u>	YES NO
17. Were the samples shipped on ice ?	YES	<u>(NO)</u>
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<u>(RAD ONLY)</u>	YES <u>(NO)</u>
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <u>(YES)</u> NO / NA (If no. see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	0.096 +/- 0.35	0.63	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

M - Requested MDC not met.

B - Analyte concentration greater than MDC.

B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

March 30, 2009

Mr. Aaron Hilshorst
Freeport McMoRan Sierrita
6200 W. Duval Mine Road
Green Valley AZ 85614

Re: ALS Paragon Workorder: 08-12-258
Client Project Name: FMI-VRP
Client Project Number: None Submitted

Dear Mr. Hilshorst:

Thirty soil samples were received from Freeport McMoRan Sierrita on December 30, 2008. The samples were scheduled for the following analyses:

Isotopic Uranium pages 1-48
Gamma Spectroscopy pages 1-66

Radium-228 by Method 9320 pages 1-14
226Radium by EPA Method 903.1 (m) pages 1-35

The results for these analyses are contained in the enclosed reports.

Thank you for your confidence in ALS Paragon. Should you have any questions, please call.

Sincerely,

ALS Paragon
Julie Ellingson
Project Manager

JME/eh

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: FreeportWorkorder No: 0812258Project Manager: JEInitials: COTDate: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF <input checked="" type="radio"/> YES	NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES ^{CT} <u>12-31-08</u>	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES ^{CT} <u>12-31-08</u>	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace ? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: #2 #4	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
External µR/hr reading: <u>12</u>		
Background µR/hr reading: <u>11</u>		
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

Broken lids: 0812258-1 No visible leakage-13-28All samples have limited volume-29-30If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick SmithDate/Time: Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Radium-226 by EPA Method 903.1(m) Case Narrative

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812258

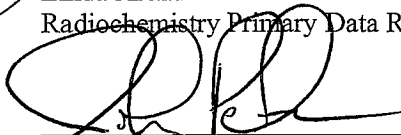

1. This report consists of the analytical results for 15 soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared and analyzed according to procedures SOP783R8 and SOP336R0. The analyses were completed on 03/17/09.
3. The analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
4. The magnitude of the negative activity for method blank RE090220-7MB is greater than the 2 sigma TPU. The analyst's review of the data does not indicate a problem with the instrument data or the subsequent reporting systems. The data quality is not believed to be affected and the results are submitted without qualification. Under typical conditions, where background level sample data is normally distributed and analyzed by paired observations, this event is likely to occur at least 2.5% of the time.
5. Laboratory control sample RE090220-7LCS has a radiometric recovery below the lower control limit of 57% at 56.5%, as indicated with an "L" qualifier on the final report. Although this recovery suggests a possible low bias in the results of the associated samples, there was a noticeable difference in the transfer of the LCS. The low bias is believed to have affected the LCS only. Results are submitted without further qualification. Please refer to NCR #11244.
6. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812258Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>11</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.Broken lids: 0812258-1 No visible leakage-13-28All samples have limited volume-29-30If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick SmithDate/Time: Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CONTROLLED NON-CONFORMANCE REPORT

Non-Conformance

Initiated By: Derek B. Caduff on 3/16/2009

Event Type: Lab QC Criteria Not Met -- LCS

Event Explanation: The LCS had a radiometric recovery below the LCL of 57% at 56.5%. Although this recovery suggests a possible low bias in the results of all the samples in the batch, there was a noticeable difference in the transfer of the LCS. The low bias is believed to have affected the LCS only.

Action To

Prevent Recurrence: Potential transfer issue. Currently investigating new transfer techniques.

Corrective Action

Corrective Action: Document in Narrative

Department Manager Approval: Jeff R. Kujawa

Approval Date: 3/19/2009

Corrective Action Comments:

Workorders Affected

PAI 783 Rev 8

Method Blank Results

Lab Name: ALS Paragon

Work Order Number: 0812258

Client Name: Freeport McMoRan Sierrita

ClientProject ID: FMI-VRP

Lab ID: RE090220-6MB

Sample Matrix: SOIL

Prep SOP: PAI 783 Rev 8

Date Collected: 20-Feb-09

Date Prepared: 20-Feb-09

Date Analyzed: 16-Mar-09

Prep Batch: RE090220-6

QCBatchID: RE090220-6-1

Run ID: RE090220-6A

Count Time: 15 minutes

Final Aliquot: 1.05 g

Result Units: pCi/g

File Name: Manual Entry

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	0.053 +/- 0.19	0.35	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

M - Requested MDC not met.

B - Analyte concentration greater than MDC.

B3 - Analyte concentration greater than MDC but less than Requested MDC.

ALS Paragon

Radium-228 by Method 9320 Case Narrative

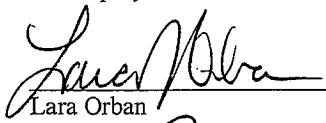

Freeport McMoRan Sierrita

FMI-VRP

Work Order Number: 0812258

1. This report consists of the analytical results for three soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared according to SW-846 Method 9320, SOP746R8. Procedure 9320 was modified as follows: The chemical yield was determined by ICP-AES measurement of the pre and post separation concentration of Ba and Y in these samples.
3. The samples were analyzed for the presence of ^{228}Ra by low background gas flow proportional counting of ^{228}Ac , which is the ingrown progeny of ^{228}Ra , according to SOP 724R10. The analyses were completed on 01/29/09.
4. The analyses results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. Method 9320 makes no reference to the analysis of soil samples. The soil samples from this work order were initially leached in concentrated nitric acid. The leachate was then processed as a water sample according to the method.
6. No further anomalous situations were noted during the preparation and analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812258Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	<input checked="" type="radio"/> YES	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	<input checked="" type="radio"/> YES	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>11</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

Broken lids: 0812258-1 No visible leakage
 -13
 -28 All samples have limited volume
 -29
 -30

If applicable, was the client contacted? ☒ YES / NO / NA Contact: Rick Smith Date/Time: Project Manager Signature / Date: JE

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

ALS Paragon

Isotopic Uranium Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812258

1. This report consists of the analytical results for 30 soil samples received by ALS Paragon on 12/30/2008.
2. These samples were prepared according to procedures SOP336R0, SOP773R10, and SOP778R12. Due to potential matrix interference, the samples were prepared at a reduced aliquot of ~1 gram.
3. The samples were analyzed for the presence of isotopic uranium according to procedure SOP714R11. The analyses were completed on 03/16/2009.
4. The isotopic analysis results for these samples are reported on a 'dry weight' basis in units of pCi/gram.
5. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
6. Uranium-234 activity is reported in method blank AS090223-1MB above the minimum detectable concentration value. The measured blank activity is below the requested MDC of 0.1 pCi/g. Results are acceptable according to SOP715R15, and are submitted without further qualification.
7. The duplicate error ratio (DER) for the U-235 analysis of sample 0812258-16 and its duplicate sample 0812258-16DUP was elevated above our warning limit. DER is defined as:

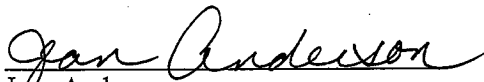

$$DER = \frac{|S - D|}{2 * \sqrt{\sigma_s^2 + \sigma_d^2}}$$

Where: S = sample result, D = duplicate result, σ_s = 1 sigma uncertainty of sample result, and σ_d = sigma uncertainty of the duplicate result. The warning limit for DER is 1.42. This sample's U-235 DER = 1.48. Results are acceptable according to PA SOP715R15.

8. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812258Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly ? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9 ?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact ? (not broken or leaking, etc.)	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine ? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice ?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>11</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

Broken lids: 0812258-1 No visible leakage
-13
-28 All samples have limited volume

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Result Units: pCi/g

File Name: Spectrum #1

CASNO	Analyte	Sample Result +/- 2s TPU	Duplicate Result +/- 2s TPU	DER	Control Limit	Lab Qualifiers
13966-29-5	U-234	2.2 +/- 0.44	2.6 +/- 0.49	0.54	2.13	
15117-96-1	U-235	0.085 +/- 0.052	0.24 +/- 0.093	1.48	2.13	W
7440-61-1	U-238	2.1 +/- 0.42	1.9 +/- 0.39	0.33	2.13	

Comments:

Duplicate Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

LT - Result is less than Request MDC, greater than sample specific MDC

M - Requested MDC not met.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

L - LCS Recovery below lower control limit.

H - LCS Recovery above upper control limit.

P - LCS, Matrix Spike Recovery within control limits.

N - Matrix Spike Recovery outside control limits

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

DER - Duplicate Error Ratio (see PAI SOP 715)

BDL - Below Detection Limit

NR - Not Reported

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.353	3.46	pCi/g	79.5	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M - The requested MDC was not met.

M3 - The requested MDC was not met, but thereported activity is greater than the reported MDC.

W - DER is greater than Warning Limit of 1.42

D - DER is greater than Control Limit of 2.13

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

ALS Paragon

Gamma Spectroscopy Case Narrative

Freeport McMoRan Sierrita **FMI-VRP**

Work Order Number: 0812258

1. The following report consists of analytical results and supporting documentation for 27 soil samples received by ALS Paragon on 12/30/08.
2. These samples were prepared according to procedure SOP739R9. Samples 0812258-2, -9, -10, -12, -13, -18, -19, -21 thru -24, and -26 thru -29 were sealed in steel cans on 01/07/09 and stored for at least 21 days to allow ^{222}Rn to approach equilibrium with its progeny. The degree of in-growth achieved prior to analysis on 01/28/09, respectively, is at least 97.78%. Conservatively assuming a radon emanation efficiency of approximately 50%, the effective radon progeny in-growth for these samples would be greater than 98.89%.
3. The samples were analyzed for the presence of gamma emitting radionuclides according to procedure SOP713R10. The analyses were completed on 02/17/09.
4. The results for these samples are reported on a "Dry Weight" basis in units of pCi/gram.
5. Sample volume was insufficient to allow preparation of duplicates in batches GS090108-4 and GS090109-8. Duplicate analyses of samples 0812258-2, -30, and -29 were performed in lieu of prepared duplicates.
6. ALS Paragon has observed a reproducible low bias in ^{226}Ra results (about -30% for the geometry in question) when using a mixed gamma source for the calibration of HPGe detectors for solid samples. This bias is eliminated by calibration using a NIST traceable ^{226}Ra source in the same geometry and configuration as the samples. This is applicable for samples 0812258-2, -9, -10, -12, -13, -18, -19, -21 thru -24, and -26 thru -29.

7. The library used for calibration and analysis employs multiple peaks for the ^{226}Ra progeny, ^{214}Pb (352 and 295 keV) and ^{214}Bi (609 and 1120 keV). Using these peaks avoids the use of the problematic ^{226}Ra photo-peak at 186 keV, which suffers from poorly resolvable interference from ^{235}U at the same energy. Final activity results for ^{226}Ra are calculated, using the uncertainty-weighted mean of the activities for the four photo-peaks, by the Seeker gamma spectroscopy software assuming secular equilibrium. This is applicable for samples 0812258-2, -9, -10, -12, -13, -18, -19, -21 thru -24, and -26 thru -29.
8. Activity concentrations above the calculated MDC are reported in some instances where minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Nuclides not meeting these requirements have been flagged with a "TI" qualifier.
9. There are cases where the sample density is less than the associated calibration standard density. Cases that exceed the limit of +/- 15% of the density of the calibration standard are flagged with a 'G', denoting a significant density difference between the sample and calibration standard. Consequently, the results may be biased high for the flagged results in this work order. If requested, ALS Paragon can perform a transmission spike in order to estimate a magnitude of this bias. The results are reported without further qualification.
10. The requested detection limit of 1.0 pCi/gram for ^{228}Ra was not met for many of the samples associated with this work order. The reported activities are greater than the achieved detection limits. The results have been flagged with a "M3" qualifier on the final reports. The results are submitted without further qualification.
11. No further problems were encountered with either the client samples or the associated quality control samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS Paragon certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

CONDITION OF SAMPLE UPON RECEIPT FORM

Paragon Analytics

Client: Freeport
Project Manager: JEWorkorder No: 0812258Initials: CDT Date: 12-30-08

1. Does this project require any special handling in addition to standard Paragon procedures?	YES	<input checked="" type="radio"/> NO
2. Are custody seals on shipping containers intact?	NONE	<input checked="" type="radio"/> YES NO
3. Are Custody seals on sample containers intact?	<input checked="" type="radio"/> NONE	YES NO
4. Is there a COC (Chain-of-Custody) present or other representative documents?	<input checked="" type="radio"/> YES	NO
5. Are the COC and bottle labels complete and legible ?	<input checked="" type="radio"/> YES	NO
6. Is the COC in agreement with samples received? (IDs, dates, times, no. of samples, no. of containers, matrix, requested analyses, etc.)	<input checked="" type="radio"/> YES	NO
7. Were airbills / shipping documents present and/or removable?	DROP OFF	<input checked="" type="radio"/> YES NO
8. Are all aqueous samples requiring preservation preserved correctly? (excluding volatiles)	<input checked="" type="radio"/> N/A	YES NO
9. Are all aqueous non-preserved samples pH 4-9?	<input checked="" type="radio"/> N/A	YES NO
10. Is there sufficient sample for the requested analyses?	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
11. Were all samples placed in the proper containers for the requested analyses?	<input checked="" type="radio"/> YES	NO
12. Are all samples within holding times for the requested analyses?	<input checked="" type="radio"/> YES	NO
13. Were all sample containers received intact? (not broken or leaking, etc.)	^{cf} <input checked="" type="radio"/> YES ₁₂₋₃₁₋₀₈	<input checked="" type="radio"/> NO
14. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, Rx CN/S, radon) headspace free? Size of bubble: <u> </u> < green pea <u> </u> > green pea	<input checked="" type="radio"/> N/A	YES NO
15. Do perchlorate LCMS-MS samples have headspace? (at least 1/3 of container required)	<input checked="" type="radio"/> N/A	YES NO
16. Were samples checked for and free from the presence of residual chlorine? (Applicable when PM has indicated samples are from a chlorinated water source; note if field preservation with sodium thiosulfate was not observed.)	<input checked="" type="radio"/> N/A	YES NO
17. Were the samples shipped on ice?	YES	<input checked="" type="radio"/> NO
18. Were cooler temperatures measured at 0.1-6.0°C? IR gun used*: <u>#2</u> <u>#4</u>	<input checked="" type="radio"/> RAD ONLY	YES <input checked="" type="radio"/> NO
Cooler #: <u>1</u>		
Temperature (°C): <u>Amb</u>		
No. of custody seals on cooler: <u>1</u>		
DOT Survey/ Acceptance Information	External µR/hr reading: <u>12</u>	
	Background µR/hr reading: <u>11</u>	
Were external µR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)		

Additional Information: PROVIDE DETAILS BELOW FOR A NO RESPONSE TO ANY QUESTION ABOVE, EXCEPT #1 AND #16.

Broken lids: 0812258-1 No visible leakage
 -13
 -28 All samples have limited volume

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	0.075 +/- 0.30	0.57	1	U

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

M - Requested MDC not met.

B - Analyte concentration greater than MDC.

B3 - Analyte concentration greater than MDC but less than Requested MDC.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	2.2 +/- 0.64	0.94	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

SIERRITA DATA REVIEW SUMMARY

Data Package Number: 08-12-175

Sampling Event: July 11th and 14th, 2008Sample-specific Parameter Review? **Yes**

Data Reviewer: Katie Abbott

Peer Reviewer: Sheri Fling

Laboratory Performance Parameters? **No**

Date Completed: August 8, 2012

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for twenty soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

Field ID	Sample Type	Lab ID	Matrix	Analyses			
				Radium-226 Method 903.1	Radium-228 By GFPC	Isotopic Uranium	Gamma Spectroscopy
CP-JS-03-0-1	SA	0812175-1	Soil	X	---	X	X ¹

Sample Type: SA = Sample
 GFPC – Gas Flow Proportional Counting
 X¹ - Radium-228
 X² - Radium-226 and Radium-228
 X^m - Matrix spike

General Overall Assessment:

_____ Data are usable without qualification.
 _____ **X** Data are usable with qualification (noted below).
 _____ Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
Sample-specific Parameters	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	<p>Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP).</p> <p>It was noted on the sample receipt form that the sample identification (ID) was listed on the container labels and the container lids. Sample CP-N08-1-3 had the lid for sample CP-N08-5-7 and sample CP-N08-5-7 had the lid for sample CP-N08-1-3. The samples were logged per the IDs listed on the container labels.</p>
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	Yes	Target analytes were not reported as detected within the associated method blanks. Data qualification was not required.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) E-JS-01-0-1 (Radium-226) Laboratory Duplicate (LD) CP-JS-03-1-3 (Gamma Spectroscopy) CP-JS-03-5-7 (Isotopic Uranium) CP-M04-1-2.5 (Isotopic Uranium) E-JS-01-0-1 (Radium-226) 	No	<p>With the exception listed in Table 1 below, the recoveries for the MS analysis were within the laboratory-determined acceptance range.</p> <p>The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event.</p> <p>When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only.</p> <p>The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. The duplicate error ratio (DER) met the QC criterion of ≤ 1.</p>
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	Yes	<p>Implied Detection Limits</p> <p>No values for radionuclides were reported as detected with associated uncertainties greater than the reported result.</p> <p>Sample Specific Chemical Recoveries</p> <p>The sample specific recoveries were within the laboratory-determined acceptance limits for the applicable methods. Data qualification was not required.</p> <p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>The LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.</p>
Field Quality Control <ul style="list-style-type: none"> Equipment Blank None Field Duplicate None 	No	<p>Equipment Blank</p> <p>An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed.</p> <p>Field Duplicate (FD)</p> <p>A field duplicate was not reported in this data package. The frequency of field</p>

Review Parameter	Criteria Met?	Comments
		duplicates did not meet the QAPP required 1 per 20 samples submitted.
MDCs Met?	No	For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary. All samples for isotopic uranium were prepared at a reduced aliquot; however, all MDC's were met. No further action is necessary.
Other Parameters <ul style="list-style-type: none"> Tentatively Identified Compounds (TICs) Case Narrative 	No	Gamma Spectroscopy Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples CP-JS-03-1-3, CP-M04-5-5.4, CP-M04-1-2.5, CP-M06-1-3, CP-JS-02-0-1, CP-N08-1-3, and CP-N08-5-7 did not meet these requirements and were flagged by the laboratory as TI and were qualified as T4 (tentatively identified) during data validation. In some cases the sample density was less than or greater than the associated calibration standard density. The density of samples CP-JS-03-5-7, E-JS-01-5-7, EV-JS-01-0-1, CP-M06-0-1, and CP-JS-02-0-1 exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

 \leq - Less than or equal to \pm - Plus or Minus

DER – Duplicate Error Ratio

LCS/LCSD – Laboratory Control Sample/Laboratory Control Sample Duplicate

MS – Matrix Spike

N1 – See Case Narrative

QAPP – Quality Assurance Project Plan

RPD – Relative Percent Difference

TPU – Total Propagated Uncertainty

% - Percent

COC – Chain of Custody

ID – Identification

LD – Laboratory Duplicate

MDC – Minimum Detectable Concentration

N/A – Not Applicable

QC – Quality Control

T4 – Tentatively Identified Compound

Table 1: Matrix Spike Outliers and Resultant Data Qualification

Radium-226 (Method 903.1)			
Sample	Analyte	MS %R (Limits)	Data Qualification
E-JS-01-0-1	Radium-226	171 (57-126)	As the potential bias was considered to be high, the radium-226 result for sample E-JS-01-0-1 was flagged as (M1).

%R – Percent Recovery

MS – Matrix Spike

M1 – Matrix spike recovery was high; the associated blank spike recovery was acceptable.

Bold indicates a recovery outside of acceptance limits.

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	1.8 +/- 0.57	1.0	1	M3

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative

TI - Nuclide identification is tentative

R - Nuclide has exceeded 8 half-lives

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

13982-63-3	Ra-226	3.3 +/- 0.79	0.22	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Y2 - Chemical Yield outside default limits
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.324	3.46	pCi/g	80.1	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is In control at 100-110%. Quantitative Yield Is assumed

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	1.9 +/- 0.61	0.39	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.
Y1 - Chemical Yield Is In control at 100-110% Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits
LT - Result is less than Requested MDC, greater than sample specific MDC
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC
M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

SIERRITA DATA REVIEW SUMMARY

Data Package Number: 08-12-255

Sampling Event: September 17th-19th, 24th, 26th, October 21st-24th, 28th, 2008

Sample-specific Parameter Review? **Yes**

Laboratory Performance Parameters? **No**

Data Reviewer: Katie Abbott

Date Completed: August 14, 2012

Peer Reviewer: Sheri Fling

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for twenty-four soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

Field ID	Sample Type	Lab ID	Matrix	Analyses			
				Radium-226 Method 903.1	Radium-228 By GFPC	Isotopic Uranium	Gamma Spectroscopy
ST-SB06 20-40	SA	0812255-1	Soil	X	---	X	X ¹
ST-SB06 300-320	FD	0812255-2	Soil	X	---	X	X ¹

Sample Type: SA = Sample FD = Field Duplicate

GFPC – Gas Flow Proportional Counting

X¹ - Radium-228

X² - Radium-226 and Radium-228

X^m - Matrix spike

General Overall Assessment:

_____	Data are usable without qualification.
<u> X </u>	Data are usable with qualification (noted below).
_____	Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
<i>Sample-specific Parameters</i>	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	<p>Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP).</p> <p>It was noted on the sample receipt form that the container label for sample ET-SB01 20-40 listed the identification (ID) as ET-SB01 20-40. The laboratory was able to correctly ID the sample by matching the collection time and date to the ID on the chain of custody (COC). In addition, it was noted on the sample receipt form that the container lids for samples ST-SB06 280-300 and ET-SB01 80-100 were received broken. They were replaced at the laboratory upon arrival. No further action was necessary.</p> <p>Per clarification from the client, sample ET-SB01 20-40 was correctly re-identified as sample ET-SB01 20-40. The data sheets and the upfront table have been updated to reflect the correct sample IDs.</p>
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	No	With the exceptions listed in Table 1 below, target analytes were not reported as detected within the associated method blanks.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) ST-SB06 60-80 (Ra-226) Laboratory Duplicate (LD) ST-SB06 260-280 (Gamma Spectroscopy) ST-SB06 20-4 (Gamma Spectroscopy) ST-SB01 237-255.5 (Gamma Spectroscopy, Ra-226) ST-SB06-220-240 (Isotopic Uranium) ST-SB06 60-80 (Isotopic Uranium) ST-SB01 40-60 (Ra-226) 	No	<p>The recoveries for the MS analysis were within the laboratory-determined acceptance range.</p> <p>The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event.</p> <p>When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only.</p> <p>The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. With the exceptions summarized below in Table 2, the duplicate error ratio (DER) met the QC criterion.</p>
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate 	Yes	<p>Implied Detection Limits</p> <p>No values for radionuclides were reported as detected with associated uncertainties greater than the reported result.</p> <p>Sample Specific Chemical Recoveries</p> <p>The sample specific recoveries were within the laboratory-determined</p>

Review Parameter	Criteria Met?	Comments
(LCS/LCSD)		acceptance limits for the applicable methods. Data qualification was not required. Laboratory Control Sample/ Laboratory Control Sample Duplicate The LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.
Field Quality Control • Equipment Blank None • Field Duplicate ST-SB06 300-320/ ST-SB06 300-320D	No	Equipment Blank An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed. Field Duplicate (FD) The agreement between parent sample results and the field duplicate sample results was evaluated. The DER met the QC criterion of ≤ 2 .
MDCs Met?	No	For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary. All samples for isotopic uranium were prepared at a reduced aliquot; however, all MDC's were met. No further action is necessary.
Other Parameters • Tentatively Identified Compounds (TICs) • Case Narrative	No	Gamma Spectroscopy Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples ET-SB01 20-40, ET-SB01 40-60, ST-SB06 220-240, ST-SB01 40-60, ST-SB01 0-20, ST-SB06 100-120, ST-SB06 160-180, ST-SB01 220-235.5, ST-SB01 237-255.5, ET-SB01 0-20, ST-SB06 280-300, ST-SB06 260-280, ET-SB02 0-20, ET-SB01 80-100, ST-SB06 120-140, ET-SB01 60-80, ET-SB02 40-50, and ST-SB06 300-320D did not meet these requirements and were flagged TI (tentatively identified) by the laboratory and qualified as T4 during data validation. In some cases the sample density is less than or greater than the associated calibration standard density. The density of samples ST-SB06 20-40, ST-SB06 300-320, ET-SB01 20-40, ET-SB01 40-60, ST-SB01 40-60, ST-SB01 0-20, ST-SB06 100-120, ST-SB06 160-180, ST-SB01 220-235.5, ST-SB01 237-255.5, ET-SB01 0-20, ST-SB06 280-300, ST-SB06 120-140, ST-SB01 200-220, ET-SB02 40-50, and ST-SB06 300-320D exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

 \leq - Less than or equal to \pm - Plus or Minus

DER - Duplicate Error Ratio

LCS/LCSD - Laboratory Control Sample/Laboratory Control Sample Duplicate

MS/MSD - Matrix Spike/ Matrix Spike Duplicate

N1 - See Case Narrative

QC - Quality Control

T4 - Tentatively Identified Compound

VOCs - Volatile Organic Compounds

% - Percent

COC - Chain of Custody

ID - Identification

LD - Laboratory Duplicate

MDC - Minimum Detectable Concentration

N/A - Not Applicable

RPD - Relative Percent Difference

TPU - Total Propagated Uncertainty

Table 1: Method Blank Outliers and Resultant Data Qualification

Isotopic Uranium			
Sample	Analyte	Concentration (pCi/g)	Data Qualification
MB Batch AS090223-1	Uranium-234	0.0067 ± 0.0083	None. All associated uranium-234 results were reported at concentrations >10x the blank contamination.

pCi/g – Picocuries per gram

B4 = Target analyte detected in the blank outside of the method acceptance criteria.

Table 2: DER Outliers and Resultant Data Qualification

Isotopic Uranium			
Sample	Analyte	DER	Data Qualification
ST-SB06 60-80	Uranium-234	1.1	The DERs between the parent sample and laboratory duplicate sample for the listed analytes exceeded the criterion of ≤ 1.0 . Therefore, the associated analytical results were qualified as estimated N6.

DER – Duplicate Error Ratio

N6 – Data suspect due to quality control failure, data reported per data user's result.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

15262-20-1	Ra-228	1.2 +/- 0.57	1.1	1	M3, TI T4

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110% Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.339	3.83	pCi/g	88.3	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

BARIUM	37050	32000	ug	86.3	40 - 110 %	
YTTRIUM	8713	4420	ug	50.7	40 - 110 %	
Total				43.8	40 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SIERRITA DATA REVIEW SUMMARY

Data Package Number: 08-12-258

Sampling Event: August 4th-5th, 11th-13th, September 25th, October 2nd-3rd, 6th, 2008

Sample-specific Parameter Review? **Yes**

Laboratory Performance Parameters? **No**

Data Reviewer: Katie Abbott

Date Completed: August 14, 2012

Peer Reviewer: Sheri Fling

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for thirty soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

Field ID	Sample Type	Lab ID	Matrix	Analyses			
				Radium-226 Method 903.1	Radium-228 By GFPC	Isotopic Uranium	Gamma Spectroscopy

General Overall Assessment:

- _____ Data are usable without qualification.
 _____ **X** Data are usable with qualification (noted below).
 _____ Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
Sample-specific Parameters	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP). It was noted on the sample receipt form that the container lids for samples EM-JS-07-5-7, EM-JS-07-15-16, ST-SB03 40-60, ST-SB03 140-160, and ST-SB01 140-160 were received broken. They were replaced at the laboratory upon arrival. No further action was necessary.
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	No	With the exceptions listed in Table 1 below, target analytes were not reported as detected within the associated method blanks.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) EM-JS-08-5-7 (Ra-226) Laboratory Duplicate (LD) EM-JS-06-0-1 (Gamma Spectroscopy) ST-SB03 140-160 (Gamma Spectroscopy) ST-SB01 140-160 (Gamma Spectroscopy, Isotopic Uranium) RA-SD-02-1.5-3.0 D (Isotopic Uranium) C-JS-05-1-3 (Isotopic Uranium, Ra-226) EM-JS-07-1-3 (Ra-226) RA-JS-02-1-3 (Ra-226, Ra-228) 	No	The recoveries for the MS analysis were within the laboratory-determined acceptance range. The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event. When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only. The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. With the exceptions summarized below in Table 2, the duplicate error ratio (DER) met the QC criterion.
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	No	Implied Detection Limits No values for radionuclides were reported as detected with associated uncertainties greater than the reported result. Sample Specific Chemical Recoveries The sample specific recoveries were within the laboratory-determined acceptance limits for the applicable methods. Data qualification was not required.

Review Parameter	Criteria Met?	Comments
		<p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>With the exceptions listed below, the LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.</p> <p><i>Radium-226</i></p> <p>The radium-226 LCS recovery associated with batch RE090220-7 was below acceptance limits of 57-1260% with a recovery of 56.3%. As the potential bias was considered to be low, the associated radium-226 sample results were flagged with an L2</p>
<p>Field Quality Control</p> <ul style="list-style-type: none"> Equipment Blank <p>None</p> <ul style="list-style-type: none"> Field Duplicate <p>RA-SD-02-0-1.5/ RA-SD-02-0-1.5D RA-SD-02-1.5-3.0/ RA-SD-02-1.5-3.0 D RA-SD-01-0-1.5 / RA-SD-01-0-1.5 D RA-JS-02-0-1.0/ RA-JS-02-0-1 D</p>	Yes	<p>Equipment Blank</p> <p>An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed.</p> <p>Field Duplicate (FD)</p> <p>Data Packages 08-12-207 (RA-SD-02-0-1.5, RA-SD-02-1.5-3.0, RA-SD-01-0-1.5, RA-JS-02-0-1.0) / 08-12-258 (RA-SD-02-0-1.5D, RA-SD-02-1.5-3.0 D, RA-SD-01-0-1.5 D, RA-JS-02-0-1 D)</p> <p>The agreement between parent sample results and the field duplicate sample results was evaluated. The duplicate error ratio (DER) met the QC criterion of ≤ 2.</p>
MDCs Met?	No	<p>For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary.</p> <p>All samples for isotopic uranium were prepared at a reduced aliquot; however, all MDC's were met. No further action is necessary.</p>
<p>Other Parameters</p> <ul style="list-style-type: none"> Tentatively Identified Compounds (TICs) Case Narrative 	No	<p>Gamma Spectroscopy</p> <p>Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples EM-JS-07-5-7, EM-JS-06-0-1, EM-JS-07-1-3, EM-JS-06-5-7, EM-JS-06-10-11, RA-SD-02-1.5-3.0 D, RA-SD-01-1.5-3.0 D, EM-JS-08-5-7, EM-JS-08-10-12, EM-JS-07-10-12, RA-SD-02-0-1.5D, ST-SB03 80-100, ST-SB04 120-140, ST-SB03 180-200, ST-SB04 100-120, ST-SB03 100-120, ST-SB03 20-40, ST-SB03 120-140, ST-SB03 160-180, ST-SB03 40-60, ST-SB03 140-160, and ST-SB01 140-160 did not meet these requirements and were flagged as TI (tentatively identified) by the laboratory and qualified as T4 during data validation.</p> <p>In some cases the sample density is less than or greater than the associated calibration standard density. The density of samples EM-JS-07-5-7, EM-JS-07-1-3, EM-JS-06-10-11, RA-JS-02-0-1 D, RA-SD-02-1.5-3.0 D, RA-SD-01-1.5-3.0 D, EM-JS-07-15-16, EM-JS-08-5-7, EM-JS-08-10-12, RA-SD-02-0-1.5D, ST-SB03 80-100, ST-SB04 120-140, ST-SB03 60-80, ST-SB04 100-120, ST-SB03 100-120, ST-SB03 20-40, ST-SB03 120-140, ST-SB03 160-180, ST-SB03 40-60, ST-SB03 140-160, and ST-SB01 140-160 exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.</p>
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

≤ - Less than or equal to

± - Plus or Minus

DER – Duplicate Error Ratio

LCS/LCSD – Laboratory Control Sample/Laboratory Control Sample Duplicate

L2 – The associated blank spike recovery was below laboratory acceptance limits

MDC – Minimum Detectable Concentration

N/A – Not Applicable

QC – Quality Control

T4 – Tentatively Identified Compound

% - Percent

COC – Chain of Custody

ID – Identification

LD – Laboratory Duplicate

MS – Matrix Spike/ Matrix Spike Duplicate

N1 – See Case Narrative

QAPP – Quality Assurance Project Plan

RPD – Relative Percent Difference

TPU – Total Propagated Uncertainty

Table 1: Method Blank Outliers and Resultant Data Qualification

Isotopic Uranium			
Sample	Analyte	Concentration (pCi/g)	Data Qualification
MB Batch as090223-1	Uranium-234	0.0067 ± 0.0083	None. All associated uranium-234 results were reported at concentrations >10x the blank contamination.

pCi/g – Picocuries per gram

B4 = Target analyte detected in the blank outside of the method acceptance criteria.

Table 2: DER Outliers and Resultant Data Qualification (Laboratory Duplicate)

Isotopic Uranium			
Sample	Analyte	DER	Data Qualification
C-JS-05-1-3	Uranium-235	1.5	The DERs between the parent sample and laboratory duplicate sample for uranium-235 exceeded the criterion of ≤1.0. Therefore, the associated analytical results were qualified as estimated N6.

DER – Duplicate Error Ratio

N6 – Data suspect due to quality control failure, data reported per data user's result.

General Overall Assessment:

_____ Data are usable without qualification.
 X Data are usable with qualification (noted below).
 _____ Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
Sample-specific Parameters	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	Yes	Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP).
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	Yes	Target analytes were not reported as detected within the associated method blanks. Data qualification was not required.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike (MS) None Laboratory Duplicate (LD) CP-SD-01-1.5-3.0 (Gamma Spectroscopy, Isotopic Uranium) CP-P12-1-3 (Gamma Spectroscopy) CP-SD-09-0-1.5 (Isotopic Uranium) CP-SD-01-0-1.5 (Radium-226) 	Yes	<p>The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event. An MS was not reported in this data package.</p> <p>When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not meet the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only.</p> <p>The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. The duplicate error ratio (DER) met the QC criterion of ≤ 1</p>
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	Yes	<p>Implied Detection Limits</p> <p>No values for radionuclides were reported as detected with associated uncertainties greater than the reported result.</p> <p>Sample Specific Chemical Recoveries</p> <p>The sample specific recoveries were within the laboratory-determined acceptance limits for the applicable methods. Data qualification was not required.</p> <p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>The LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.</p>
Field Quality Control <ul style="list-style-type: none"> Equipment Blank None Field Duplicate None 	No	<p>Equipment Blank</p> <p>An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed.</p> <p>Field Duplicate (FD)</p> <p>A field duplicate was not reported in this data package. The frequency of field duplicates did not meet the QAPP required 1 per 20 samples submitted.</p>
MDCs Met?	No	<p>For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary.</p> <p>All samples for isotopic uranium were prepared at a reduced aliquot; therefore, some of the MDCs were not met. However, all detected results were reported above the MDCs achieved. No further action is necessary.</p>

Review Parameter	Criteria Met?	Comments
Other Parameters <ul style="list-style-type: none"> Tentatively Identified Compounds (TICs) Case Narrative 	No	Gamma Spectroscopy Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples CP-SD-02-0-1.5, CP-SD-03-0-1.5, CP-SD-03-1.5-3.0, CP-SD-04-1.5-3.0, and CP-Q09-1-3 did not meet these requirements and were flagged TI (tentatively identified) by the laboratory and qualified as T4 during data validation. In some cases the sample density was less than or greater than the associated calibration standard density. The density of samples CP-P07-1-3, CP-P07-0-1, CP-SD-04-1.5-3.0, and CP-P12-1-3 exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

SIERRITA DATA REVIEW SUMMARY

Data Package Number: 08-12-178

Sampling Event: July 11th, 14th, and 15th, 2008Sample-specific Parameter Review? **Yes**

Data Reviewer: Katie Abbott

Peer Reviewer: Sheri Fling

Laboratory Performance Parameters? **No**

Date Completed: August 8, 2012

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for eighteen soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

General Overall Assessment:

_____	Data are usable without qualification.
<u> X </u>	Data are usable with qualification (noted below).
_____	Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
Sample-specific Parameters	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	<p>Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP).</p> <p>It was noted on the sample receipt form that the collection time listed on the container label did not match the collection time listed on the chain of custody (COC) for sample RP-JS-05-0-1. The sample was logged in per the COC. In addition, the containers for samples RP-JS-02-0-1, CP-JS-04-15-17, and OD-JS-03-1-3D were received at the laboratory broken; therefore, the analyses were not performed.</p>
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	No	With the exceptions listed in Table 1 below, target analytes were not reported as detected within the associated method blanks.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) RP-JS-02-1-3D (Radium-226) Laboratory Duplicate (LD) RP-JS-02-5-7 (Gamma Spectroscopy) EM-P24-10-11 (Gamma Spectroscopy) RP-JS-01-1-3 (Isotopic Uranium) RP-JS-02-1-3D (Isotopic Uranium) EM-JS-08-1-3 (Isotopic Uranium) EM-JS-08-0-1 (Radium-226) CP-JS-04-10-12 (Radium-226) 	No	<p>With the exception listed in Table 2 below, the recoveries for the MS analysis were within the laboratory-determined acceptance range.</p> <p>The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event.</p> <p>When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only.</p> <p>The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. The duplicate error ratio (DER) met the QC criterion of ≤ 1.</p>
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	Yes	<p>Implied Detection Limits</p> <p>No values for radionuclides were reported as detected with associated uncertainties greater than the reported result.</p> <p>Sample Specific Chemical Recoveries</p> <p>The sample specific recoveries were within the laboratory-determined acceptance limits for the applicable methods. Data qualification was not required.</p> <p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>The LCS/LCSD recoveries were within the laboratory acceptance limits. Data</p>

Review Parameter	Criteria Met?	Comments
		qualification was not required.
Field Quality Control <ul style="list-style-type: none"> Equipment Blank Field Duplicate None RP-JS-02-1-3/ RP-JS-02-1-3D EM-JS-08-1-3/ EM-JS-08-1-3D	No	Equipment Blank An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed. Field Duplicate (FD) The agreement between parent sample results and the field duplicate sample results was evaluated. The DER met the QC criterion of ≤ 2 .
MDCs Met?	No	For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary. All samples for isotopic uranium were prepared at a reduced aliquot; therefore, some of the MDCs were not met. However, all detected results were reported above the MDCs achieved. No further action is necessary.
Other Parameters <ul style="list-style-type: none"> Tentatively Identified Compounds (TICs) Case Narrative 	No	Gamma Spectroscopy Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples RP-JS-02-5-7, RP-JS-02-10-12, RP-JS-02-15-17, RP-JS-01-1-3, RP-JS-01-5-7, RP-JS-01-10-12, RP-JS-01-15-17, RA-JS-01-1-3, RA-JS-03-0-1, RP-JS-02-1-3D, EM-JS-08-0-1, EM-JS-08-1-3D, CP-JS-04-10-12, CP-JS-04-20, RP-JS-02-1-3, and EM-JS-08-1-3 did not meet these requirements and were flagged TI (tentatively identified) by the laboratory and were qualified as T4 during data validation. In some cases the sample density was less than or greater than the associated calibration standard density. The density of samples RP-JS-02-5-7, RP-JS-02-10-12, RP-JS-02-15-17, RP-JS-01-1-3, RP-JS-01-5-7, RP-JS-01-0-1, RP-JS-01-10-12, RP-JS-01-10-12, RA-JS-05-0-1, RP-JS-01-15-17, RA-JS-01-1-3, EM-P24-10-11, RP-JS-02-1-3D, EM-JS-08-1-3D, CP-JS-04-5-7, CP-JS-04-20, RP-JS-02-1-3, and EM-JS-08-1-3 exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

\leq - Less than or equal to

\pm - Plus or Minus

DER - Duplicate Error Ratio

LCS/LCSD - Laboratory Control Sample/Laboratory Control Sample Duplicate

MS - Matrix Spike

N1 - See Case Narrative

QAPP - Quality Assurance Project Plan

LD - Laboratory Duplicate

MDC - Minimum Detectable Concentration

N/A - Not Applicable

QC - Quality Control

T4 - Tentatively Identified Compound

Table 1: Method Blank Outliers and Resultant Data Qualification

Isotopic Uranium			
Sample	Analyte	Concentration (pCi/g)	Data Qualification
MB Batch AS090210-3	Uranium-238	0.025 ± 0.021	None. All associated uranium-238 results were reported at concentrations >10x the blank contamination.
MB Batch AS090217-1	Uranium-235	0.021 ± 0.026	All associated isotopic uranium-235 results reported as detected at concentrations <10x the blank contamination were flagged with a B4.

pCi/g – Picocuries per gram

B4 = Target analyte detected in the blank outside of the method acceptance criteria.

Table 2: Matrix Spike Outliers and Resultant Data Qualification

Radium-226 Method 903.1			
Sample	Analyte	MS %R (Limits)	Data Qualification
RP-JS-02-1-3D	Radium-226	131 (57-126)	As the potential bias was considered to be high, the radium-226 result for sample RP-JS-02-1-3D was flagged as (M1).

%R – Percent Recovery

M1 – Matrix spike recovery was high; the associated blank spike recovery was acceptable.

MS – Matrix Spike

Bold indicates a recovery outside of acceptance limits.**Table 3: DER Outliers and Resultant Data Qualification**

Sample	Analyte	DER	Data Qualification
Radium-226 Method 903.1			
CP-JS-04-10-12	Radium-226	1.8	The DERs between the parent sample and laboratory duplicate sample for radium-226 exceeded the criterion of ≤1.0. Therefore, the associated analytical results were qualified as estimated N6.

DER – Duplicate Error Ratio

N6 – Data suspect due to quality control failure, data reported per data user's result.

SIERRITA DATA REVIEW SUMMARY

Data Package Number: 08-12-210

Sampling Event: August 5th, 6th, 7th, and 11th, 2008Sample-specific Parameter Review? **Yes**

Data Reviewer: Katie Abbott

Peer Reviewer: Sheri Fling

Laboratory Performance Parameters? **No**

Date Completed: August 10, 2012

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for seventeen soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

Table 1: Method Blank Outliers and Resultant Data Qualification

Isotopic Uranium			
Sample	Analyte	Concentration (pCi/g)	Data Qualification
MB Batch AS090220-4	Uranium-234	0.053 ± 0.037	None. All associated uranium-234 and uranium-238 results were reported at concentrations $>10\times$ the blank contamination.
	Uranium-238	0.045 ± 0.033	

pCi/g - Picocuries per gram

B4 = Target analyte detected in the blank outside of the method acceptance criteria.

Table 2: Matrix Spike Outliers and Resultant Data Qualification

Radium-226 (Method 903.1)			
Sample	Analyte	%R (Limits)	Data Qualification
CS-JS-01-1-3	Radium-226	52.2 (57-126)	As the potential bias was considered to be low, the radium-226 result for sample CS-JS-01-1-3 was flagged as (M2).

%R – Percent Recovery

M2 – Matrix spike recovery was low; the associated blank spike recovery was acceptable.

MS – Matrix Spike

Bold indicates a recovery outside of acceptance limits.

SIERRITA DATA REVIEW SUMMARY

Date Completed: August 17, 2012

This report summarizes the verification of analytical data for seventeen soil samples. ALS Laboratory Group of Fort Collins, Colorado performed the analyses.

The data review was conducted in accordance with the criteria specified in the Draft Addendum – Quality Assurance Project Plan (QAPP) Sierrita Mine Green Valley, Arizona (September 2008). Independent review flags were assigned as required by Appendix E in the QAPP. The table below summarizes the samples and analyses presented in this data package.

Field ID	Sample Type	Lab ID	Matrix	Analyses		
				Radium-226 Method 903.1	Isotopic Uranium	Gamma Spectroscopy

General Overall Assessment:

- _____ Data are usable without qualification.
- X Data are usable with qualification (noted below).
- _____ Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
Sample-specific Parameters	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	<p>Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP).</p> <p>It was noted on the sample receipt form that :</p> <ul style="list-style-type: none"> Samples CS-JS-05-1-3 and C-JS-02-0-1 were received at the laboratory broken; therefore, the analyses for are not performed. The container lid for sample CS-JS-05-1-3D was received broken. It was replaced at the laboratory upon arrival. The collection time listed on the container label did not match the collection time listed on the chain of custody (COC) for sample EM-M26-5-7. The sample was logged in per the COC.
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	Yes	Target analytes were not reported as detected within the associated method blanks.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) C-JS-03-0-1 (Radium-226) Laboratory Duplicate (LD) EM-H22-0-1 (Gamma Spectroscopy) CS-JS-05-1-3D (Gamma Spectroscopy) CS-JS-06-0-1 (Isotopic Uranium) EM-JS-01-1-3 (Radium-226) 	No	<p>The recoveries for the MS analysis were within the laboratory-determined acceptance range.</p> <p>The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event.</p> <p>When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only.</p> <p>The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. With the exceptions summarized below in Table 1, the DER met the QC criterion.</p>
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	Yes	<p>Implied Detection Limits</p> <p>No values for radionuclides were reported as detected with associated uncertainties greater than the reported result.</p> <p>Sample Specific Chemical Recoveries</p> <p>The sample specific recoveries were within the laboratory-determined acceptance limits for the applicable methods. Data qualification was not required.</p> <p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>The LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.</p>

Review Parameter	Criteria Met?	Comments
Field Quality Control <ul style="list-style-type: none"> Equipment Blank Field Duplicate None CS-JS-05-1-3/ CS-JS-05-1-3D	No	Equipment Blank An equipment blank was not submitted for this sampling event. Therefore, decontamination procedures could not be assessed. Field Duplicate (FD) – Data Packages 08-12-212 (CS-JS-05-1-3D)/ 08-12-258 (CS-JS-05-1-3) The agreement between parent sample results and the field duplicate sample results was evaluated. With the exceptions listed in Table 1 below, the DER met the QC criterion of ≤ 2 .
MDCs Met?	No	For gamma spectroscopy analysis, some of the MDC were not met. However, all results were reported above the MDCs achieved. No further action is necessary. All samples for isotopic uranium were prepared at a reduced aliquot; however, all MDC's were met. No further action is necessary.
Other Parameters <ul style="list-style-type: none"> Tentatively Identified Compounds (TICs) Case Narrative 	No	Gamma Spectroscopy Activity concentrations above the calculated MDC are reported in some instances where the minimum nuclide identification criteria are not met. Such tentative identifications result when the software attempts to calculate net activity concentrations for analytes where either one or both of the following criteria are not satisfied: the 'diagnostic' peak for a nuclide must be identified above the critical level, or the minimum library peak abundance must be attained. Radium-228 results for samples CS-JS-05-0-1, CS-JS-06-0-1, EM-JS-02-0-1, EM-JS-01-1-3, EM-M26-0-1, EM-M26-5-7, C-JS-01-0-1, C-JS-01-1-3, EM-H22-1-3, C-JS-03-0-1, and C-JS-03-1-3 did not meet these requirements and was flagged as TI (tentatively identified) by the laboratory and qualified as T4 during data validation. In some cases the sample density is less than or greater than the associated calibration standard density. The density of samples CS-JS-05-1-3D, EM-JS-01-0-1, EM-M26-0-1, EM-M26-1-3, EM-M26-5-7, C-JS-01-0-1, C-JS-01-1-3, C-JS-02-1-3, C-JS-02-5-7, EM-H22-0-1, C-JS-03-0-1, and C-JS-03-1-3 exceeded the density of the calibration standard (limit of $\pm 15\%$) and were flagged by the laboratory as G and were qualified as N1 during data validation.
Package Completeness	Yes	The results are usable as qualified for the project objective. The data are 100% complete.

General Overall Assessment:

_____	Data are usable without qualification.
<u> X </u>	Data are usable with qualification (noted below).
_____	Some or all data are unusable for any purpose (detailed below).

Case Narrative Summary: Except as noted below, any of the issues noted in the laboratory case narrative potentially affecting data quality are addressed in the appropriate sections in the table below.

Review Parameter	Criteria Met?	Comments
<i>Sample-specific Parameters</i>	Complete with "Yes", "No", or "Not Applicable (N/A)".	For each "No" response, list what was out, associated acceptance limits, all qualified data, and bias direction or reference associated table with pertinent details.
Chain of Custody (COC) & Sample Receipt	No	Samples were received intact and under custody. The cooler temperatures were ambient upon arrival at the laboratory per the quality assurance project plan (QAPP). It was noted on the sample receipt form that the container lids for samples ST-SB01 180-200 and ST-SB06 140-160 were received broken. They were replaced at the laboratory upon arrival.
Holding Times	Yes	All samples were analyzed within the method required holding time.
Method Blanks	No	With the exceptions listed in Table 1 below, target analytes were not reported as detected within the associated method blanks.
Matrix Quality Control <ul style="list-style-type: none"> Matrix Spike(MS) ST-SB06 240-260 (Ra-226) Laboratory Duplicate (LD) EM-C22-1-3 (Gamma Spectroscopy) ST-SB01 100-120 (Gamma Spectroscopy) OD-SD-05-1.5-3.0 (Gamma Spectroscopy) ST-SB04 40-60 (Isotopic Uranium) ST-SB06 180-200 (Isotopic Uranium) EM-JS-02-1-3 (Isotopic Uranium) OD-JS-01-1-3 (Isotopic Uranium) ST-SB01 80-100 (Ra-226) ET-SB02 60-80 (Ra-226) 	No	The recoveries for the MS analysis were within the laboratory-determined acceptance range. The frequency of MS samples submitted meet the QAPP required 1 per 20 samples submitted. However, based on limited volume and method limitations, an MS was only performed for radium-226 (method 903.1) samples collected in association with this event. When MS issues accounted for less than 35% of the MS analyses conducted, applicable data qualification was limited to qualification of the parent sample. When greater than 35% of the MS results did not met the criteria, qualification was extended to all associated samples. For this sample event, MS issues accounted for less than 35%; therefore, qualification was limited to parent results only. The agreement between parent sample results and the laboratory duplicate sample results was evaluated. The total propagated uncertainty (TPU) was used in the calculation instead of uncertainty as the laboratory reported the result as activity ± 2 TPU. With the exceptions summarized below in Table 2, the duplicate error ratio (DER) met the QC criterion.
Method Quality Control <ul style="list-style-type: none"> Implied Detection Limits Sample Specific Chemical Recovery (Chemical Yield) Laboratory Control Sample/ Laboratory Control Sample Duplicate (LCS/LCSD) 	No	Implied Detection Limits No values for radionuclides were reported as detected with associated uncertainties greater than the reported result. Sample Specific Chemical Recovery With the exception listed below, the sample specific recoveries were with the laboratory-determined acceptance limits for the applicable methods. <i>Isotopic Uranium</i> The tracer uranium-232 recovery for sample OD-JS-02-5-7 was below the acceptance limit with a recovery of 14.6%. Therefore, the isotopic uranium

Review Parameter	Criteria Met?	Comments
		<p>results for sample OD-JS-02-5-7 were flagged with N6.</p> <p>Laboratory Control Sample/ Laboratory Control Sample Duplicate</p> <p>The LCS/LCSD recoveries were within the laboratory acceptance limits. Data qualification was not required.</p>

15262-20-1	Ra-228	2.2 +/- 0.66	1.2	1	M3,G NI

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	1.5 +/- 0.31	0.42	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	3.5 +/- 1.7	2.5	5	LT

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
BARIUM	35220	31600	ug	89.8	40 - 110 %	
YTTRIUM	8713	6210	ug	71.3	40 - 110 %	
Total				64.0	40 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide Identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	2.7 +/- 0.81	1.6	1	M3

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide Identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	1.9 +/- 0.65	0.58	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is In control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
G - Sample density differs by more than 15% of LCS density.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	2.6 +/- 0.47	0.55	1	G N

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	1.7 +/- 0.74	1.0	1	M3,G,TI T4/N1

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU
Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
Y2 - Chemical Yield outside default limits.
LT - Result is less than Requested MDC, greater than sample specific MDC.
M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.
M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.
SI - Nuclide identification and/or quantitation is tentative.
TI - Nuclide identification is tentative.
R - Nuclide has exceeded 8 half-lives.
G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)
MDC - Minimum Detectable Concentration (see PAI SOP 709)
BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

15117-96-1	U-235	0.18 +/- 0.078	0.052	0.1	
7440-61-1	U-238	2.7 +/- 0.51	0.052	0.1	

Chemical Yield Summary

Carrier/Tracer	Amount Added	Result	Units	Yield	Control Limits	Flag
U-232	4.509	3.72	pCi/g	82.5	30 - 110 %	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

15262-20-1	Ra-228	2.0 +/- 0.57	0.74	1	TI TH

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110% Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
13982-63-3	Ra-226	1.9 +/- 0.69	0.67	1	

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC.

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Report Basis: Dry Weight

Final Aliquot: 78.9 g

Prep Basis: Dry Weight

Moisture(%): NA

Result Units: pCi/g

File Name: 090093d04

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	1.9 +/- 0.65	1.1	1	M3,G,TI <i>TH, NI</i>

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	2.1 +/- 0.63	0.86	1	TI <i>TH</i>

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110% Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

CASNO	Target Nuclide	Result +/- 2 s TPU	MDC	Requested MDC	Lab Qualifier
15262-20-1	Ra-228	4.2 +/- 0.93	1.1	1	M3,G PI

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.

Abbreviations:

TPU - Total Propagated Uncertainty (see PAI SOP 743)

MDC - Minimum Detectable Concentration (see PAI SOP 709)

BDL - Below Detection Limit

Comments:

Qualifiers/Flags:

U - Result is less than the sample specific MDC or less than the associated TPU

Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.

Y2 - Chemical Yield outside default limits.

LT - Result is less than Requested MDC, greater than sample specific MDC.

M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

M - The requested MDC was not met.

SQ - Spectral quality prevents accurate quantitation.

SI - Nuclide identification and/or quantitation is tentative.

TI - Nuclide identification is tentative.

R - Nuclide has exceeded 8 half-lives.

G - Sample density differs by more than 15% of LCS density.
